relationship to the beings of the spiritual world These are among the compelling questions addressed by Rudolf Steiner in this concise yet powerful series of lectures given in March 1923 comprising this volume of The Collected Works of Rudolf Steiner In these lectures Steiner portrays among other things the work of various hierarchical beings both in collaboration and sometimes in opposition to one another whose activity and strife in the spiritual world is mirrored in the migrations of and wars among peoples on Earth The clashes between East and West for example are thus seen in an entirely new light heralding a sea change in the approach to history No longer should events on Earth be viewed as isolated within themselves but rather as interwoven in a grand vibrant tapestry formed from the threads that connect humanity on Earth with the activity and aims of exalted spiritual beings Humanity has profound potential for both good and evil The question is whether we will be able to rise to a renewed form of cognition through which we can once again grasp living spiritual reality or we will persist in the dead intellectualized thinking so common today thinking that as Steiner points out in the final lecture of this volume if not transformed will lead to the gradual destruction of Earth itself These lectures are a tour de force that should not be neglected by any serious student of history or the future of humanity and human life more broadly Includes 10 color plates This volume is a translation from German of Die Impulsierung des weltgeschichtlichen Geschehens durch geistige Mächte Rudolf Steiner Verlag 1989 GA 222 Cover Image Naval Battle of Le Panto 1571 by Luca Cambiasi 1521 1585 at the Royal Monastery of San Lorenzo de El Escorial Spain

**Symmetry as a Developmental Principle in Nature and Art** Werner Hahn, 1998 Looking beyond the boundaries of various disciplines the author demonstrates that symmetry is a fascinating phenomenon which provides endless stimulation and challenges He explains that it is possible to readapt art to the sciences and vice versa by means of an evolutionary concept of symmetry Many pictorial examples are included to enable the reader to fully understand the issues discussed Based on the artistic evidence that the author has collected he proposes that the new ars evolutoria can function as an example for the sciences The book is divided into three distinct parts each one focusing on a special issue In Part I the phenomenon of symmetry including its discovery and meaning is reviewed The author looks closely at how Vitruvius Polyclitus Democritus Plato Aristotle Plotinus Augustine Alberti Leonardo da Vinci and Durer viewed symmetry This is followed by an explanation on how the concept of symmetry developed The author further discusses symmetry as it appears in art and science as well as in the modern age Later he expounds the view of symmetry as an evolutionary concept which can lead to a new unity of science In Part II he covers the points of contact between the form developing process in nature and art He deals with biological questions in particular evolution The collection of new and precise data on perception and knowledge with regard to the postulated reality of symmetry leads to further development of the evolutionary theory of symmetry in Part III The author traces the enormous treasure of observations made in nature and culture back to a few underlying structural principles He demonstrates symmetry as a far reaching leading structuring causal element of evolution as the idea lying behind nature and culture Numerous controllable reproducible double mirror
