

## Linear Relations

Some dimes have an image of *Bluenose*. This famous Canadian schooner is a symbol of Nova Scotia's prominence in the fishing industry and international trade. *Bluenose* was launched in 1921 in Lunenburg, Nova Scotia, as a racing ship and a fishing schooner.

A replica schooner, *Bluenose II*, has served as the floating ambassador for Nova Scotia since 1971.

The sailors who raced *Bluenose* had to think about factors such as length of a race, wind speed, and current. In racing, one factor is often related to another. For example, it takes longer to run a race if the current is strong. Sometimes the relationship between two factors can be represented mathematically in a linear relation.

Shipbuilders and sailors today continue to use linear relations to design, build, and operate vessels such as windsurf boards, racing sailboats, and supertankers.

### What You Will Learn

- to represent pictorial, oral, and written patterns using linear expressions, equations, and graphs
- to interpret patterns in graphs
- to solve problems involving pictorial, oral, and written patterns by using linear equations and graphs

#### Did You Know?

From 1921 to 1938, *Bluenose* won the annual International Fishermen's Trophy for racing ships. After World War II, fishing schooners were retired. The undefeated *Bluenose* was sold to operate as a freighter in the West Indies. The ship sank in 1946.
