**New Directions in Interpersonal Communication Research** Sandi W. Smith, Steven R. Wilson, 2009-02-25 New Directions offers the best graduate professional level introduction to the field of interpersonal communication currently available It is compact accessible and authoritative Mac Parks Journal of Communication Presenting today s cutting edge interpersonal communication research and reflecting on the changes that

have occurred over the past three decades *New Directions in Interpersonal Communication Research* is relevant and useful to a broad audience from advanced undergraduate students to the most experienced researchers in the area. By telling the stories of research, this volume's contributors avoid the dry encyclopedic style that is typical of chapters in handbooks. This new collection showcases the vital collaborative and interdisciplinary interpersonal communication research that is being conducted today. Editors Sandi W. Smith and Steven R. Wilson bring together a combination of established and newer scholars as well as boundary spanners—those who are applying interpersonal theories and concepts to areas such as family health, intercultural, organizational, and mediated communication—to illustrate the wealth and breadth of this area of study and research. Each chapter has clear applied value with an emphasis on doing theoretically driven work that has implications for social issues and problems. **Key Features** Offers a broad overview of interpersonal communication as an area of study, situating it historically, discussing advances in theory as well as application, and including a broad range of metatheoretical perspectives. **Traces** evolving trends during the past 30 years that have shaped the study of interpersonal communication and continue to make it relevant, including issues about the larger society such as globalization and technology, about the communication discipline such as fractionalization, and about interpersonal communication in particular, such as a focus on darker topics. **Includes** topics that range from evolutionary and dialectical perspectives on interpersonal communication to uncertainty and turbulence in interpersonal relationships, to comforting and destructive patterns of communication. **Illustrates** how interpersonal communication research can be applied to such diverse topics as information management and privacy, family adaptation to medical diagnoses, and how writing blogs affects self-esteem. **Tells** the background stories of contributors, research programs, including why the topic matters, what they found, where their work is going, and lessons learned. *New Directions in Interpersonal Communication Research* is intended as a core text for graduate and upper-level undergraduate courses in Interpersonal Communication, Relational Communication, and Communication Theory. **Speech**
