

Interventional Cardiology

Maintenance of Certification Examination Blueprint

What Does the Examination Cover?

The exam is designed to evaluate the extent of the candidate's knowledge and clinical judgment in the areas in which an interventional cardiologist should demonstrate a high level of competence.

Expertise in the broad domain of interventional cardiology will be assessed, including diagnosis and management of both common and rare conditions that have important consequences for patients and understanding and integration of results of significant clinical trials.

Exam content is consistent with a pre-established blueprint, or table of specifications, developed by the Interventional Cardiology Test Committee and used as a guide in exam preparation. The blueprint is reviewed and revised annually to ensure that it is current. In addition, practicing interventional cardiologists, trainees in interventional cardiology, and training program directors are surveyed periodically to provide feedback on the blueprinting process.

The majority of questions are based on patient presentations occurring in settings that reflect current medical practice. Questions requiring simple recall of medical facts are in the minority; the majority of questions require integration of information, prioritization of alternatives, and/or utilization of clinical judgment in reaching a correct conclusion. Some questions require interpretation of pictorial material, such as coronary angiograms, ventriculograms, intravascular ultrasound images, nuclear perfusion studies, computed tomograms, magnetic resonance images, electrocardiograms, echocardiograms, and peripheral vascular imaging studies.

The content areas covered and their relative proportions on the exam are as follows:

Medical Content Category	Relative Percentage
Case Selection and Management	25%
Procedural Techniques	25%
Basic Science	15%
Pharmacology	15%
Imaging	15%
Miscellaneous	5%
Total	100%
