

Committee: Disarmament and International Security Committee (GA1)

Issue: Government espionage and its role in international security

Student Officer: Myrto Kourouni

Position: Co-Chair

Introduction

Government espionage is a very heated topic, as it one of the biggest legal, ethical and moral concerns of our time. Throughout the world's history, we learn that intelligence and surveillance have always been existing activities for every government to gain information, power and also protect its citizens. In the new era of technology, both state and non-state parties have managed not only to gain access to political data, as well as individual's private information. Moreover, the existence of intelligence agencies and their role in international security ignites suspicions other their actions, especially after Edward Snowden leaked in 2013, classified National Security Agency documents that exposed the US secret surveillance programme. Thus this situation along with International terrorism situates more fear into the society. Concerning to ending and preventing terrorism, many countries carry out laws and security measures that restrict individual freedoms and civil rights, giving priority to security. However, the restriction of privacy in response to terrorism jeopardises democracy itself. And has raised concerns about the violation of fundamental human rights, such as liberty and privacy. Concluding, this topic's main questions to be answered are: Is government espionage justified? Is today's society ready to balance security and privacy? And with what measures will every country be able to achieve this balance?

Definition of Key-Terms

Espionage

An intelligence activity. Specifically, the act of collecting military, industrial, and political data, that a nation holds secret, for the benefit of another. It can involve the analysis of diplomatic reports, publications, statistics, and broadcasts, as well as surveillance and spying (human sources/agents) or technical means. Espionage is also considered a crime against the government.

Cyber espionage/CYBINT

Cyber intelligence. The use of internet, networks, software and or computers, to gain illicit access to private or confidential information, typically held by a government or other organization.

HUMINT

Human intelligence. The use of human sources, surveillance and spying, to gain illicit access to private or confidential information.

Surveillance

The act of observing persons or groups either with their knowledge (overt surveillance) or without their knowledge (covert surveillance).
