

# ADP QuickPunch Finger Scan Verification Device Installation Guide

The ADP QuickPunch<sup>®</sup> finger scan verification device allows you to require employees to perform verification when they swipe a badge or enter their personal identification number (PIN) at the Series 4000 timeclock. To use the verification device, your ADP host system must include the ADP QuickPunch software.

When you attach the finger scan verification device to the Series 4000 timeclock, the device must fit flat against the mounting surface.

## Tools You Will Need

No. 2 Phillips screwdriver	Security screw (supplied with Series 4000)	Flat or 1/8 inch (3.2 mm) screw

Device Part Number: 470000-002  
Device Revision: B

## Determining the Part Number of the Timeclock

**Important:** If the part number of the timeclock is 4000000-000, you cannot register the timeclock with the finger scan verification device using time or AC input. You must secure the timeclock cover (consisting of AC input or use an internal AC input filter. The finger scan verification device connects differently to the main board in the timeclock depending on the part number of the timeclock.

Determine the part number of the timeclock by either of the following steps:

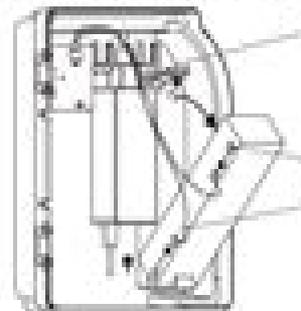

- Look at the bar code label on the bottom of the timeclock (the underside of the timeclock as you look at the display and keypad). The part number is directly above the bar code.
- If the Series 4000 timeclock uses firmware version 2.0 or higher, access Master status mode in the timeclock and see the Hardware Report. The part number of the timeclock is included in the report output on the screen. For more information about the Hardware Report, refer to the Series 4000 Timeclock User's Guide.

## Preparing for the Installation

Do the following only if you are adding the ADP QuickPunch verification device to an installed and assembled Series 4000 timeclock. Otherwise, go directly to [Installing and Connecting the Verification Device](#) to begin the installation.

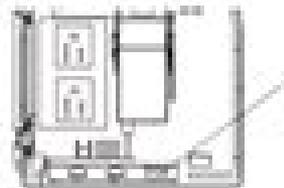

- Use the security screws to loosen the security screws on the right side of the timeclock and open the cover.
- Remove the timeclock, exposing the power cord from the electrical outlet.

- Remove the top cover of time or a battery battery installed in the timeclock.
  - Flip the battery out of its position by pushing up on the top bracket (1) and pulling the top of the battery outward.
  - Disconnect the black wire from the negative battery terminal (2). Then, disconnect the red wire from the positive battery terminal (3) and remove the battery.

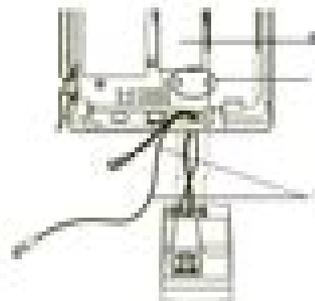

## Installing and Connecting the Verification Device

- Slide in the main board into one of the slots in a back plate covering the right square cable access hole (1) at the bottom of the timeclock. If there is a plate, use a 1/8 inch (3.2 mm) screw to secure the two slots on the same side, and remove the plate.

- To attach the device to the timeclock:
  - Thread the device's cable and ground wire (1) into the timeclock through the square access hole and align the screw holes in the device with the holes in the face of the timeclock.
  - Insert the two mounting screws (2) using a No. 2 Phillips screwdriver. If necessary, slide the timeclock (3) up slightly so that you can more easily install the screws.

- If the part number of the timeclock is 4000000-000 or 4000000-001, plug the cable into the BA-232 connection on the main board.

- If the part number of the timeclock is 4000000-000, plug the cable into the BA-232 connection on the main board.

- Ground the verification device by attaching the green ground wire to the main board of the timeclock. Where you attach the ground wire depends on the timeclock model and which optional devices are installed in the timeclock.

**Warning:** Failure to attach the ground wire to the main board will result in damage to the finger scan verification device.
