Manual Calculation Of Pipe Support Structures:

Heating Services in Buildings David E. Watkins, 2011-07-07 Water based heating systems are efficient flexible versatile and offer many advantages over other heating systems These advantages fast response good controllability efficient zonal heating and largely silent operation all require that initial design installation commissioning and maintenance be carried out to a high standard by competent engineers Heating Services in Buildings provides the reader with a detailed and thorough understanding of the principles and elements of heating buildings using modern water based heating systems A key theme of the book is that there is little difference in the approach to the design and engineering between domestic and commercial installations The author s detailed but highly practical approach to the subject ensures there is sufficient information for students from both a craft background and those with more academic backgrounds to understand the material This approach is complemented by straightforward easy to use diagrams Heating Services in Buildings supports a range of educational courses including degree level building services engineering NVQ Level 4 Higher Professional Diploma in Building Services Engineering City Guilds supplementary heating course and the Heating Design and Installation Course accredited by the European Registration Scheme ERS
