Rogowski, 2024-05-31 It is the nature of war to increase the executive at the expense of the legislative authority wrote Alexander Hamilton in the Federalist Papers The balance of power between Congress and the president has been a powerful thread throughout American political thought since the time of the Founding Fathers And yet for all that has been written on the topic we still lack a solid empirical or theoretical justification for Hamilton's proposition For the first time William G Howell Saul P Jackman and Jon C Rogowski systematically analyze the question Congress they show is more likely to defer to the president's policy preferences when political debates center on national rather than local considerations Thus World War II and the post 9/11 wars in Afghanistan and Iraq significantly augmented presidential power allowing the president to enact foreign and domestic policies that would have been unattainable in times of peace But contrary to popular belief there are also times when war has little effect on a president's influence in Congress The Vietnam and Gulf Wars for instance did not nationalize our politics nearly so much and presidential influence expanded only moderately Built on groundbreaking research The Wartime President offers one of the most significant works ever written on the wartime powers presidents wield at home
