Gordon, 2007-12-01 American business has recently been under fire charged with inflated pricing and an inability to compete in the international marketplace However the evidence presented in this volume shows that the business community has been unfairly maligned official measures of inflation and the standard of living have failed to account for progress in the quality of business equipment and consumer goods Businesses have actually achieved higher productivity at lower prices and new goods are lighter faster more energy efficient and more reliable than their predecessors Robert J Gordon has written the
