*Clinical Application of Stereotactic Body Radiotherapy (SBRT): Cranium to Prostate* Dwight E. Heron,John Austin Vargo,2016-06-21 Stereotactic radiosurgery is a relatively recent radiation technique initially developed using a frame based system in 1949 by a Swedish neurosurgeon Lars Leksell for lesions not amendable to surgical resection Radiosurgery is founded on principles of extreme radiation dose escalation afforded by precise dose delivery with millimeter accuracy Building upon the success of frame based radiosurgery techniques which were limited to cranial tumors and invasive head frame placement advances in radiation delivery and image guidance have lead to the development of stereotactic body radiotherapy SBRT SBRT allows for frameless delivery of dose distributions akin to frame based cranial stereotactic radiosurgery to both cranial and extra cranial sites and has emerged as a important treatment strategy for a variety of cancers from the cranium to prostate Herein we highlight ongoing investigations for the clinical application of SBRT for a variety of primary and recurrence cancers aimed at examining the growing clinical evidence supporting emerging roles for SBRT in the ever growing oncologic armamentarium

*How to Run a College* Brian C. Mitchell,W. Joseph King,2018-01-15 How can colleges stay relevant in the twenty first century Residential colleges are the foundation on which US higher education is based These institutions possess storied traditions fondly cherished by students alumni and faculty There is no denying however that all colleges today struggle with changing consumer preferences high sticker prices and aging infrastructure Technological and pedagogical alternatives not to mention growing political pressure present complex challenges What can colleges and smaller universities do to stay relevant in today s educational and economic climate In their concise guide How to Run a College Brian C Mitchell and W Joseph King analyze how colleges operate Widely experienced as trustees administrators and faculty they understand that colleges must update their practices monetize their assets and focus on core educational strategies in order to build strong institutions Mitchell and King offer a frank yet optimistic vision for how colleges can change without losing their fundamental strengths To survive and become sustainable they must be centers of dynamic learning as well as economic engines able to power regional state and national economies Rejecting the notion that American colleges are holdovers from a bygone time How to Run a College shows instead that they are centers of experimentation and innovation that heavily influence higher education not only in the United States but also worldwide
