McDaniel, Thomas L. Campbell, David B. Seaburn, 2013-03-09 Despite a well publicized shift away from the traditional family structure the family remains the most basic relational unit in society and the physician's most potent ally. A family orientation in health care can provide a wider understanding of illness and a broader range of solutions than the classic biomedical model. **FAMILY ORIENTED PRIMARY CARE: A MANUAL FOR MEDICAL PROVIDERS** offers practical guidance for the physician who would like to take greater advantage of this resource. The result is a readable guide structured around step by step protocols that are vividly illustrated with case studies drawn from the author's extensive collaboration at the University of Rochester School of Medicine. **Taylor's Manual of Family Medicine** D. Job Description Manual for Medical Practices Courtney H. Price, Alys Novak, 1999 This comprehensive manual helps you develop an effective strategy for job description implementation shows you how to conduct appropriate job analyses and helps you understand the attendant legal issues. Includes a disk of generic job descriptions to use as is or modify for your practice. The Beecham Manual for Family Practice John Fry, 2012-12-06 This third edition of the Beecham Manual has its

origins in a manual produced by Selwyn Carson for his general practice in Christchurch New Zealand. He produced loose leaf sets of instructions for his practice team and colleagues. Beecham Research Laboratories of New Zealand did a great service for the medical profession by publishing and distributing Dr Carson's manual there. The British version of the Beecham Manual had different objectives. The vocational training programme needed basic resources and the British Manual was created as an easy to read reference book on common problems and methods in general practice. The first and second editions met with enthusiastic approval from principals, trainers and trainees. This third edition follows the same general format but has been completely revised and updated and includes many new additions. The five sections are: o planned care of definable population and other groups o principles of teaching and learning o emergencies and their management o psychiatry o clinical care of common conditions. We have kept to simple clear and brief presentations of our conjoint views based on our experiences in our own practices. We dedicate this third edition to our colleagues involved in caring, learning and teaching. They may not agree with us completely but we hope that we will make them consider our suggestions and use them for thought, debate and discussion. We hope also that it will be used as a work book for the whole practice team.
