Field Operations Guide for Disaster Assessment and Response U.S. Agency for International Development, 2013-07-01 In developing this third revision of version 4.0 of the Field Operations Guide for Disaster Assessment and Response the Office of U.S. Foreign Disaster Assistance (OFDA) of the United States Agency for International Development (USAID) has drawn on the expertise of numerous state, national, and international agencies and organizations. Selected sources of information include the United Nations High Commissioner for Refugees Handbook for Emergencies, the United Nations Office for the Coordination of Humanitarian Affairs United Nations Disaster Assessment and Coordination Field Handbook, and the U.S. Public Health Service's Handbook of Environmental Health, among others. The Field Operations Guide for Disaster Assessment and Response has been created as a reference tool for individuals sent to disaster sites to undertake initial assessments or to participate as members of a Disaster Assistance Response Team (DART). It contains information on general responsibilities for disaster responders, formats and reference material for assessing and reporting on populations at risk, DART position descriptions and duty checklists, descriptions of OFDA stockpile commodities, information for working with military in the field, and much more. Its myriad resources, extensive information, and handy compact format make this field guide a necessary companion for those participating in a variety of disaster assessment and response field operations.

Federal Emergency Management Agency Incident Management Handbook Federal Emergency Management Agency (U.S.), 2018-05-11 The Federal Emergency Management Agency (FEMA) is responsible for coordinating the delivery of federal support to state, local, tribal, and territorial governments under Presidential emergency or major disaster declarations or to other federal agencies under the concept of federal-to-federal support. It is important to recognize that FEMA does not assume responsibility for local incident command activities but instead provides a structure for the command, control, and coordination of federal resources to states, local incident commands, and other end users. The FEMA Incident Management Handbook (IMH) is a tool to assist FEMA emergency management personnel in conducting their assigned missions in the field. The IMH provides information on FEMA's incident-level operating concepts, organizational structures, functions, position descriptions, and key assets and teams. The IMH is intended for use by FEMA personnel deployed at the incident level. However, the IMH also provides whole community stakeholders operating in a FEMA facility information about key incident-level FEMA functions. The concepts in the IMH are applicable to FEMA operations during Stafford Act-based Presidential declarations and non-Stafford Act incidents involving federal-to-federal support.
