

Reading 1: Freakonomics Chapter 2

Try to read Chapter 1 about **incentives** before you read Chapter 2 if you have already bought the book. It is also very interesting.

You only need to write a few lines for each question (preferably bullet points) – as much or as little as you want. I will grade & return your work for the next lecture so you know how you are doing. Note that this work is optional – it does NOT count towards your final grade, and you don't have to do it if you don't want to.

For every reading I will have three categories of questions. The first category of questions are simple comprehension questions and if you can do these, you will pass this module. The second category of questions are harder and will be required to gain the top two grades. The third category is mainly for those people who feel that the course is too easy for them and need something harder to sink their teeth into (there are always two or three of these in every class!). You really don't need to worry about the third category.

1. Easier Questions:

Q1.1. Why were the Ku Klux Klan dangerous? Did the violence performed by them match their power over people? If not, why not? (circa p. 54)

Q1.2. What did Stetson Kennedy do to disrupt the Ku Klux Klan? (circa p. 58)

Q1.3. Why does a car instantly lose a quarter of its value the day it is bought? (circa p. 61)

Q1.4. What is an information asymmetry? Why was it important to Enron? (circa p. 63)

Q1.5. Why do real estate agents have an incentive to not get you the best price? (circa p. 66)

Q1.6. What is the difference between the racial preferences which people advertise online when using an internet dating service versus what they privately think? (circa p. 76)

2. Harder Questions:

Q2.1. Given what you have read in the chapter about how information asymmetries were used by Enron to defraud others, plus how investment rating agencies consistently rated Enron as an excellent investment despite knowing otherwise (another information asymmetry), suggest some reasonable causes for how the present credit crunch and economic recession occurred.

Q2.2. Why do you think people when using the dating website adhere so strongly to prevailing sociocultural stereotypes when they are much more relaxed when not using the dating website?

3. Really Hard Questions (just for any of you who find this course too easy! I don't expect anyone to answer these):

Q3.1. Why do information asymmetries concentrate wealth upon a few at the expense of the many, and therefore are information asymmetries equal to the potential for a mirrored wealth asymmetry? If so, what might prevent the actualisation of the mirrored wealth asymmetry potential? [Search Wikipedia for "information asymmetries"]

Q3.2. What relationship do information asymmetries have to the organisational structures and boundaries which give forth to them? In other words, how do information asymmetries contribute to the semantics, syntactics and pragmatics of society's institutional semiology and vice versa in return? [Search Wikipedia for "semiotics" and the web for "The Santiago Theory of Cognition"]

Freakonomics Chapter Questions And Answers:

Economics Made Fun N. Aydinonat, Jack Vromen, 2017-10-02 Best selling books such as *Freakonomics* and *The Undercover Economist* have paved the way for the flourishing economics made fun genre While books like these present economics as a strong and explanatory science the ongoing economic crisis has exposed the shortcomings of economics to the general public In the face of this crisis many people including well known economists such as Paul Krugman have started to express their doubts about whether economics is a success as a science As well as academic papers newspaper columns with a large audience have discussed the failure of economic to predict and explain ongoing trends The emerging picture is somewhat confusing economics made fun books present economics as a method of thinking that can successfully explain everyday and freaky phenomena On the other hand however economics seems to fail in addressing and explaining the most pressing matters related to the field of economics itself This book explores the confusion created by this contradictory picture of economics Could a science that cannot answer its own core questions really be used to explain the logic of everyday life This book was originally published as a special issue of the *Journal of Economic Methodology* *Freakonomics* Steven D. Levitt, Stephen J. Dubner, 2005 *Freakonomics* is a groundbreaking collaboration between Levitt and Stephen J. Dubner an award winning author and journalist They usually begin with a mountain of data and a simple question Some of these questions concern life and death issues others have an admittedly freakish quality Thus the new field of study contained in this book *freakonomics* It is true that readers of this book will be armed with enough riddles and stories to last a thousand cocktail parties But *Freakonomics* can provide more than that It will literally redefine the way we view the modern world **BOOK JACKET** *Engaging College and University Students* Ken Badley, 2022-09-02 *Engaging College and University Students* outlines creative and effective course organization and teaching learning strategies for higher education courses By describing specific instructional best practices rather than addressing general questions about teaching in higher education the author presents a valuable resource for educators to consult in the moment The author explores the challenges of engaging students in online settings and draws comparisons with face to face strategies of engagement By organizing the strategies according to course progress and offering corresponding rubrics for assessment this guide for instructors offers a solid foundation for an ever changing teaching and learning landscape **Predictive Analytics** Eric Siegel, 2013-02-07 *Mesmerizing* fascinating The Seattle Post Intelligencer The *Freakonomics* of big data Stein Kretsinger founding executive of Advertising.com Award winning Used by over 30 universities Translated into 9 languages An introduction for everyone In this rich fascinating surprisingly accessible introduction leading expert Eric Siegel reveals how predictive analytics works and how it affects everyone every day Rather than a how to for hands on techies the book serves lay readers and experts alike by covering new case studies and the latest state of the art techniques Prediction is booming It reinvents industries and runs the world Companies governments law enforcement hospitals and universities are seizing upon the power These institutions
