Sigma Phi Epsilon Journal Sigma Phi Epsilon, 1928 *Routledge Handbook of Sport and Legacy* Richard Holt, Dino Ruta, 2015-03-02 What remains of a great sporting spectacle after the last race is run or the final match is played How can the vast expense of mounting such events be justified What if there is nothing left behind or what if the legacy is negative a costly infrastructure which is unused or a debt ridden host city The Routledge Handbook of Sport and Legacy addresses perhaps the most important issue in the hosting of major contemporary sporting events the problem of legacy It offers a rigorous innovative and comparative insight into this contested concept from interdisciplinary and practical perspectives Major events must now have a conscious credible and defined policy for legacy to meet public expectations The book provides a comprehensive survey of the various kinds of legacy that can be delivered as well as a close examination of the potential benefits and practical challenges involved in each From hard legacies such as stadia and infrastructure to soft legacies including skill development attitude change and capacity building the book offers both a historical case study and an innovative strategic management approach and establishes the limits of what can realistically be achieved in terms of economic social cultural physical and sporting development The Routledge Handbook of Sport and Legacy includes contributions from world leading scholars and practitioners and features detailed case studies of major sports events from around the world including the FIFA World Cup and ten Olympics Games from London in 1908 to London 2012 It is invaluable reading for students and researchers working in sport studies events management human geography economics or planning and an essential reference for any professional engaged in delivering legacy through sport Neoliberalism, Oligarchy and Politics of the Event Žarko Paić, 2020-01-28 Based on insight into Foucault's lectures on biopolitics which consider the notion of neoliberalism for all future relationships between individuals and society and the state and the economy this book shows that the oligarchic model of politics and culture management today is a result of the rise and fall of mass political movements The ideologies of the end of the twentieth century with which neo liberalism perfectly establishes a balance are reflected in the combination of technoscience rational choice and individualism In this way the rule is reversed into a cybernetic market as a management model Today transnational corporations control the states and their political subjects with sovereignty rendered an illusion by the obsolescence of the modern project Since the post imperial order in the 21st century requires the expansion of total power rather than the fragmentation of freedom it is necessary to explore the hybrid relationship between economics and politics The corporate system of activities denotes a subject to all forms of organization of the state and society from the trade unions to the universities from institutionalized religion to social welfare and sport The consequence of this can be seen in the disappearance of the essence of society This book investigates the logic of world historical progress from the cybernetic governance system and the new way of legitimizing capitalism in the 21st century to all forms of suspension of fundamental ideas which have marked the politics of modernity Town Development
