

### Plan: Anticipatory

Use your previous two market activity experiences to anticipate what you expect to see by plotting all six output rates against the two MC's graphed between 0 and 100. Be sure to do a complete market price determination using the market for a commodity, "Oil" (see the notes on the attached cards) and also use a range of buyers that would price competitively to find a price that brings quantity demanded to equal quantity supplied.

#### Part A

- Figure 23.2 presents a summary of the market and activities during your market. Now fill in the table accordingly.
- Use the data for MC<sub>1</sub>, MC<sub>2</sub>, and the supply schedule and the average market quantity of 25. Determine the profitably MC and MC's for the market.
