The better understanding is developed not only through theoretical knowledge but practical knowledge is equally important to enhance the overall understanding of the subject and topics. So Mr Pradeep Dwivedi has introduced a complete lab activity book which is strictly based on class 11 physics CBSE pattern and follows the latest NCERT and State Board curriculum. All the experiments in this Science Lab Manual have been given in a simple, lucid and interactive manner. The theory given with each experiment gives complete knowledge of each term, concept and definition in order to provide a compact knowledge to the students at one place. Viva voce questions are given with each experiment to test students' understanding of related experiments. All the lab-based experiments have well-labeled diagrams which clearly demonstrate the details of the apparatus that are used, the correct way of handling laboratory apparatus and performing the experiments methodically. The basic purpose of this Lab Manual is to provide the students with appropriate guidance so that they can easily understand, carry out and document the experiments in the Science Laboratory. Some demonstration experiments are also included to illustrate principles and laws of physics. Illustrative diagrams have been used at the places where it is required. The Lab Manual comes with practical lessons followed by Lab experiments after each chapter, projects and attached Notebook for jotting down all the essential information. The aim of this Science Lab Manual is to help class 11 students to prepare and understand the complex physics concepts through an experimental approach by utilizing pedagogically enhanced content of the Lab Manual and with a compact knowledge base for improving their analytical, experimental skills and learning abilities.
