The Trend Management Toolkit A. Kjaer, 2014-10-07 In a fast moving world businesses need to keep up with data analysis and pattern spotting to identify future opportunities Anne Lise Kjaer presents a unique methodology for global trend spotting along with practical tools and approaches to help companies and organizations analyse market changes and determine the way ahead **Autonomous Weapons Systems and International Norms** Ingvild Bode, Hendrik Huelss, 2022-01-15

Autonomous weapons systems seem to be on the path to becoming accepted technologies of warfare The weaponization of artificial intelligence raises questions about whether human beings will maintain control of the use of force The notion of meaningful human control has become a focus of international debate on lethal autonomous weapons systems among members of the United Nations many states have diverging ideas about various complex forms of human machine interaction and the point at which human control stops being meaningful In *Autonomous Weapons Systems and International Norms* Ingvild Bode and Hendrik Huelss present an innovative study of how testing developing and using weapons systems with autonomous features shapes ethical and legal norms and how standards manifest and change in practice Autonomous weapons systems are not a matter for the distant future some autonomous features such as in air defence systems have been in use for decades They have already incrementally changed use of force norms by setting emerging standards for what counts as meaningful human control As UN discussions drag on with minimal progress the trend towards autonomizing weapons systems continues A thought provoking and urgent book *Autonomous Weapons Systems and International Norms* provides an in depth analysis of the normative repercussions of weaponizing artificial intelligence Handbook Of Climate Change And Agroecosystems: The Agricultural Model Intercomparison And Improvement Project (Agmip) Integrated Crop
