

Working of a Pyramid Scheme

How does it all start?

Recruiters approach with bogus claims of high returns and get-rich-quick promises. Recruits are expected to pay high entry fees or buy overpriced product packages. More the joining fees, higher the benefits.

1

How does it progress?

Recruits may be given products to sell but focus is laid on recruiting more people. Product sales are not really appreciated.

2

How are commissions paid?

Recruits are paid commission for bringing in new members and new members recruit more people who pay joining fees. The more people you recruit, the higher your commissions will be.

3

Who will get the benefits?

The benefit will be only for the early entrants at the top. At a certain level recruits find it difficult to get fresh recruits.

4

How does a pyramid collapse?

Eventually new members will stop joining and the system will collapse. People at bottom lose all their investments while those at the top pocket the money.

How To Report Pyramid Schemes:

Discrimination, Vulnerable Consumers and Financial Inclusion Cătălin-Gabriel Stănescu, Asress Adimi Gikay, 2020-12-28

This book addresses the questions of discrimination vulnerable consumers and financial inclusion in the light of the emerging legal socioeconomic and technological challenges New technologies such as artificial intelligence driven consumer credit risk assessment and Fintech platforms the changing nature of vulnerability due to the ongoing COVID 19 pandemic as well as the sophistication of digital technologies which help circumvent legal barriers and protections necessitate the continuous study of the existing legal frameworks and measures that are capable of tackling these challenges Organized in two major parts the first addresses from multiple national angles the idea of a human rights approach to consumer law in order to replace the mantra of economic efficiency that characterizes financial services with those of human dignity and freedom from discrimination and from debt induced servitude The second tackles the challenges posed by increased usage of technology in connection with financial services which tends to solve but also creates additional issues for consumers in general and for vulnerable groups in particular

How Companies Lie Larry Elliott, Richard Schroth, 2002-06-25 The questions investors need to ask The answers corporate America must give about the true facts of corporate performance and value During the 2001 baseball season when games were played at Enron Field in Houston a typical reaction was What the hell is Enron and what do they do Now we know more about the executives and inner workings of today s best known rogue company than we ever imagined But it turns out that Enron is just the most egregious case of a disturbing trend and the seemingly unstoppable tendency of some capitalists to destroy capitalism Something like 50 percent of American households directly support the markets by investing in stocks and mutual funds But some of the people entrusted with the responsibility

for maintaining and managing the corporation senior executives boards of directors auditing firms have become engaged in what can only be called economic terrorism Enron Sunbeam Global Crossing and Waste Management are but the tip of the iceberg Luckily there are ways for investors to spot corporate smoke and mirrors and challenge the players Larry Elliott and Richard Schroth show investors the questions that need to be asked to get a handle on the performance reality of companies The corporate world in turn needs a return to reality and authenticity in business operations finance accounting and deal making This need for performance reality is not an issue confined to a few companies who engage in unethical and illegal behavior The technological pace of change along with increasingly complicated business transactions makes global markets more and more complex The assumption however has always been that we have the management competence and rigor to ensure shareholder value Enron is definitive proof that the way companies are run the gap between what they say is reality and what is really the case is frightening And this gap has severe implications for millions of people who are employees of and investors in these companies Using Enron as the touchstone Larry Elliott and Richard Schroth show investors how to think about and measure the candor of corporations the Wall Street players and their supporters
