Challenges of Conflicting School Reforms Mark Berends, JoAn Chun, Gina Schuyler Ikemoto, Sue Stockly, R. J. Briggs, 2002-03-29 A decade ago New American Schools NAS launched an ambitious effort for whole school reform to address the perceived lagging achievement of American students and the lackluster school reform attempts that have produced so few meaningful changes As a private nonprofit organization NAS set out to help schools and districts significantly raise the achievement of large numbers of students by offering whole school designs and design based assistance during the implementation process NAS is currently in the scale up phase of its effort and its designs are being widely diffused to schools across the nation During the 1997_1998 and 1998_1999 school years RAND assessed the effects of NAS designs on classroom practice and student achievement in a sample of schools in a high poverty district RAND found that high poverty schools often have fragmented and conflicting environments with difficult and changing political currents and entrenched unions Teachers in high poverty schools tend to face new accountability systems and fluctuating reform agendas These teachers generally lack sufficient time for implementing reform efforts often becoming demoralized and losing their enthusiasm for the difficult task of improving student performance under difficult conditions RAND concluded that high stakes tests may motivate schools to increase performance and to seek out new curricula and instructional strategies associated with comprehensive school reforms However those same tests may provide disincentives to adopt richer more in depth curricula that can succeed in improving

the learning opportunities of all students particularly those in high poverty settings *Everyday Mathematics* University of Chicago. School Mathematics Project, 2001 *Year/Glance Pacing Chrt Gr2 CA Math 02* HSP, 2001 **Year/Glance Pacing Chrt Gr1 CA Math 02** HSP, 2001 **Everyday Mathematics**, 2004 Contains comprehensive background information about mathematical content and program management This manual familiarizes teachers with the program's features routines and provides ideas for organizing and implementing the curriculum *Elementary Mathematics Curriculum Materials* Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors **Hands Down, Speak Out** Kassia Omohundro Wedekind, Christy Hermann Thompson, 2023-10-10 Math coach Kassia Omohundro Wedekind and literacy coach Christy Hermann Thompson have spent years comparing notes on how to build effective classroom communities across the content areas How they wondered can we lay the groundwork for classroom conversations that are less teacher directed and more conducive to student to student dialogue Their answers start with Hands Down Conversations an innovative discourse structure in which students ideas and voices take the lead while teachers focus on listening and facilitating In addition to classroom stories and examples Christy and Kassia provide 28 micro lessons designed to help K 5 students develop and exercise their speaking and listening muscles Inside Hands Down Speak Out you'll learn how to Build talk communities that are accessible to everyone especially those whose voices are often traditionally left out of classroom discourse Analyze classroom conversations in order to plan next steps for developing the classroom talk community Plan and facilitate three types of conversations across literacy and math Christy and Kassia believe that the development of dialogue skills is worth the investment of time not only because it has the power to deepen our understanding of literacy and mathematics but also to deepen our understanding of ourselves our communities and the world *Houghton Mifflin Math*
