STUDENT HANDOUT
BASIC ACTIVITY

- What observations can you make about the overall shape of each graph? (Imagine that you are drawing a line that connects the tops of the horizontal bars.)
 - What do the shapes of the two graphs indicate about the distribution of beak depth measurements in these two groups of medium ground finches?
- Compare the distribution of beak depths between survivors and nonsurvivors. In your answer, include the shape of the distributions, the range of the data, and the most common measurements.
- Based on what you saw in the film, think about how changes in the environment may have affected which birds survived the drought. Propose a hypothesis to explain differences in the distribution of beak depths between survivors and nonsurvivors.
- Let's look in more detail at the mean beak depths in the two groups of birds to understand the meaning of standard deviation.
 - How do the mean beak depths and standard deviations of the mean beak depths compare?
 - If the standard deviation of the two samples were to be vastly different, what would you conclude about the two groups?
