Princip Microeconomics Test B N. Gregory Mankiw, Penny Kugler, 2000-08 Nonparametric Econometrics Qi Li, Jeffrey Scott Racine, 2023-07-18 A comprehensive up to date textbook on nonparametric methods for students and researchers Until now students and researchers in nonparametric and semiparametric statistics and econometrics have had to turn to the latest journal articles to keep pace with these emerging methods of economic analysis Nonparametric Econometrics fills a major gap by gathering together the most up to date theory and techniques and presenting them in a remarkably straightforward and accessible format The empirical tests data and exercises included in this textbook help make it the ideal introduction for graduate students and an indispensable resource for researchers Nonparametric and semiparametric methods have attracted a great deal of attention from statisticians in recent decades While the majority of existing books on the subject operate from the presumption that the underlying data is strictly continuous in nature more often than not social scientists deal with categorical data nominal and ordinal in applied settings The conventional nonparametric approach to dealing with the presence of discrete variables is acknowledged to be unsatisfactory This book is tailored to the needs of applied econometricians and social scientists Qi Li and Jeffrey Racine emphasize nonparametric techniques suited to the rich array of data types continuous nominal and ordinal within one coherent framework They also emphasize the properties of nonparametric estimators in the presence of potentially irrelevant variables Nonparametric Econometrics covers all the material necessary to understand and apply nonparametric methods for real world problems

Sustainability of Economic Growth in East Asia Hiroyuki Taguchi, 2025-04-18 This book is a rarity in that it analyzes comprehensive updates of East Asian economies beyond COVID 19 with quantitative and scientific methods COVID 19 has brought in structural changes such as the facilitation of digitalization and the slowdown of globalization in the region s economies Meanwhile those economies have adjusted their structures to the changes and have enhanced their resilience against the shocks beyond COVID 19 in order to sustain their economic growth These adjustments have accompanied the transformations of industries such as servicification global value chains and trade and investment patterns Policy momentums have also been affected by the structural changes caused by COVID 19 in areas such as poverty alleviation environment and foreign aid So far however there have been only a very limited number of quantitative studies to describe the economic transformations toward the post COVID 19 era among the vast literature of East Asian studies This book applies scientific approaches such as data oriented and econometric methods In this manner the book enriches empirical evidence in academic literature and also contributes to evidence based policymaking This study is also based on the research collaboration with Mae Fah Luang University in Thailand which specializes in border economies in the Greater Mekong Subregion Thus the study s outcomes will especially interest academic researchers and policymakers **Ricardo's Dream** Nat Dyer, 2024-11-26 From the workings of financial markets to our response to the ecological crisis economic theory shapes
