

## Lubricating & Insulating Materials Lab Report

### Types of lubricants:

| Types of lubricants |            |                   |                      |
|---------------------|------------|-------------------|----------------------|
| Solid lubricants    | Semi solid | Liquid Lubricants | Synthetic lubricants |
| Wax                 | Grease     | Polyglycols       | Imines               |
| Talc                | Vaseline   | Silicones         | Amides               |
| Mica                |            |                   |                      |

### Additives used in lubricants

- Anti-oxidant: Aromatic amines, Phenols, Sulphides and phosphates
- Corrosion Inhibitor: Amino salts and salts of sulphonic acids
- Antiwear agents: Triresyl phosphate
- Foam inhibitors: Glycerols

### Properties of lubricants:

- A good lubricant generally possesses the following characteristics:
- high boiling point and low freezing point (in order to stay liquid within a wide range of temperature)
- High viscosity index
- Thermal stability
- Hydraulic stability
- Corrosion prevention
- High resistance to oxidation.

### Selection of Lubricants:

Roller chain lubricant is applied to the outer surfaces and allowed to flow into the pin-and-bushing joint. For this reason, coating the chain with a heavy, thick grease does little toward supplying the joint with the lubricant it needs. Oil does the job better.

The oil grade, viscosity, and purity are the most important factors for proper chain lubrication. Because some grades of oil contain additives or detergents that may foam or leave a residue in the chain's joints, it is best to use non-detergent, single-viscosity petroleum oils selected primarily for the drive operating temperatures, Table 1. If available, antifoam, anti-rust, and extreme-pressure additives

| SAE Grade | Temperature, F | Temperature, C |
|-----------|----------------|----------------|
| 5         | -50 to 50      | -45 to 10      |
| 10        | -20 to 80      | -29 to 27      |
| 20        | 10 to 110      | -12 to 43      |
| 30        | 20 to 130      | -7 to 54       |
| 40        | 30 to 140      | -1 to 60       |
| 50        | 40 to 150      | 4 to 68        |

Note: When the temperature range permits a choice, the heavier grade should be used.
