A genre-based analysis of English research article abstracts and the linguistic feature of personal pronouns for financial economics

MING Zhen-jie

(English Department, College of Foreign Languages and Literature, North-West Normal University, Lanzhou Gansu 730078, China)

Abstract: This paper presents an empirical study of move structures and personal pronouns of fifty English RA (research article) abstracts based on the model of Bhatia (1990). It revealed that three other move patterns were ascertained besides ten out of the analyzed abstracts following his move order. The analysis of personal pronouns showed that first-person plural pronouns are used far more frequently than other types of personal pronouns and no presence of the second-person and the third-person pronouns were detected in the abstracts. A further analysis suggests that first-person plural pronouns can perform multiple functions in abstracts. ESP (English as Special Purpose) teachers may benefit from the study to guide students to explore the discourse conventions of the RA abstracts in their own texts.

Key words: RA abstract for financial economics; genre analysis; move; personal pronouns

1. Introduction

With the recognition of the role English plays in the world language, researchers need to read English research articles to keep abreast with the latest development of a relevant field and exchange academic information. "An abstract, as commonly understood, is a description or factual summary of the much longer report, and is meant to give the reader an exact and concise knowledge of the full article" (Bhatia, 1993, p. 78). It is, therefore, the urgent need that Chinese researchers and students obtain a comprehensive understanding of the genre knowledge about RA abstracts.

Over the last 20 years, a large number of studies on academic writing have focused on research articles, in particular, its structure, social construction and historical evolution (Samraj, 2002). Swales (1990, p. 132), in an overview of completed textual studies of the genre of the research article (RA), says that "it is easy to see that some fields are much less well represented than others; for example, there is very little on disciplines such as economics or sociology". Therefore, financial economics was chosen as the discipline of the present study to fill the gap. A further justification for the present study is that it will be a contribution to the comprehensive and global research in genre analysis of research articles.

2. Method

2.1 General principles and procedures of data collection

In order to ensure reliability of the results as well as eliminate writer's biases, data collection should strictly follow the scientific method of sampling. Principles suggested by Nwogu (1997, p. 121) as to the selection of

Evidence-based Otitis Media Richard M. Rosenfeld, Charles D. Bluestone, 2003 Evidence Based Otitis Media offers one stop shopping for the best current evidence to guide management decisions at the individual, organizational and societal levels. This text details the importance of evidence based data in interpreting the ever enlarging body of literature on otitis media. The editors have assembled an impressive group of experts on all aspects of otitis media and addressed comprehensively many issues related to methodology, clinical management and consequences of this disease. The eight chapters comprising the methodology section provide the necessary background and detail to allow physicians and other health professionals to understand and appreciate the value of evidence based medicine. Updates include the incorporation of new original research, systemic reviews and evidence reports to existing chapters. New chapter topics include evidence based medicine, professional evidence reports, molecular and translational research, complementary and alternative medicine, bacteriologic efficacy of antimicrobials, vaccine prevention, international management perspectives, meta analysis of speech and language sequelae, suppurative complications, host susceptibility to sequelae and judicious use of systemic and topical antimicrobials.

FEATURES Maturation of evidence based medicine as a foundation for clinical care is reflected throughout the text. Extensive evidence tables summarize study characteristics and quantitative outcomes for clinically relevant endpoints. Internationally distinguished contributors selected based on both their clinical expertise and their ability to write for an evidence based text.

Lab Reports and Projects in Sport and Exercise Science Mike Price, 2021-12-30 Most science degrees will have a practical or laboratory based component which will require some sort of final report whether this be a conventional laboratory report or a final year dissertation.
