Writing Philosophy Papers

The purpose of a philosophy paper is to make an argument. Although arguments can vary in their level of formality, a more formal argument can be broken down into a series of bullet points and not lose any credibility. The basic structure of the argument is a series of “premises,” statements that the author either takes for granted or proves to the reader, followed by a “conclusion” that results from the premises. A simple argument might look something like this:

1. No bear can fly.
2. Pooh is a bear.
3. Therefore, Pooh cannot fly.

In this argument, steps 1 and 2 are premises (in this case, we take them for granted). Step 3 is the conclusion that we have proven from the premises.

Philosophical arguments are judged by two qualifiers: validity and soundness. A valid argument is one in which the conclusion logically follows from the premises. A sound argument is a valid argument with premises that are actually *true*. The argument above is a sound argument. However, we might conceive of an argument which is valid, but not sound:

1. If it is raining, I am made of wood.
2. It is raining.
3. Therefore, I am made of wood.

In this argument, the conclusion would logically follow *if the premises were true*. However, they are not true, so it is valid, but not sound. It’s important to understand this distinction to ensure that one’s arguments are logical (valid) and actually deal with the truth (sound). Otherwise, who cares?

More complicated arguments may require that the writer prove some of the premises with smaller, embedded arguments (for example, we might ask for a proof that “If it is raining, I am made of wood”). These should all follow the same guidelines above, except that the premise in question becomes the conclusion of the new argument. The most important thing here is to make sure that one does not get lost in the fray; always keep the conclusion in mind.
