Foremost, I would like to express my sincere gratitude to my advisor Prof. Ying Wu for the continuous support of my Ph.D study and research, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my Ph.D study.

Besides my advisor, I would like to thank the rest of my thesis committee: Prof. Aggelos K.Katsaggelos, Prof. Thrasyvoulos N.Pappas, and Dr. James Crenshaw, for their encouragement, insightful comments, and hard questions.

My sincere thanks also goes to Dr. James Crenshaw, Dr. Senthil Periaswamy, and Dr. Qiong Liu, for offering me the summer internship opportunities in their groups and leading me working on diverse exciting projects.

I thank my fellow labmates in Northwestern Vision Group: Gang Hua, Ting Yu, Zhimin Fan, Shengyang Dai, Junsong Yuan, Jiang Xu, Jialue Fan, and Neelabh Gupta, for the stimulating discussions, for the sleepless nights we were working together before deadlines, and for all the fun we have had in the last four years. Also I thank my friends in Tsinghua University: Chen Fan, Wensheng Wang, Bo Qin, Xiwei Wang, Yonggang Zhao, Hua Chen, Junlin Li, and Rui Zhou. In particular, I am grateful to Dr. Chen Fan for enlightening me the first glance of research.

Last but not the least, I would like to thank my family: my parents Siyu Yang and Xiaolan Ding, for giving birth to me at the first place and supporting me spiritually throughout my life.

Chinese PhD Thesis Acknowledgements Hua Peng, 2010 While there is a comparatively rich research literature on English acknowledgement texts research into Chinese PhD thesis acknowledgement texts especially the social roles of the texts has received little attention To fill this gap this book examines a corpus of Chinese PhD thesis acknowledgement texts in order to explore both the typical structure of the texts and their social function within the particular university setting as well as within a broader social context The author uses stratified purposive sampling and semi structured text based interviews with PhD graduates their supervisors and other acknowledgee representatives to gather data Furthermore PhD guidebooks supervisors CVs and graduates publications have been collected Three theoretical notions communities of practice audience and politeness are drawn into account for the findings of the study Besides uncovering several undocumented move patterns the book offers insightful understanding of acknowledgement texts both as a part genre of research writing as well as a window of the textual and social world of PhD graduates chorus of gratitude *How to Write a PhD in Biological Sciences* John Measey, 2021-11-29 You don t have to be a genius to write a PhD Of course it will always involve a lot of hard work and dedication but the process of writing is a whole lot easier if you understand the basic ground rules This book is a guide through the dos and don ts of writing a PhD It will be your companion from the point when you decide to do a PhD providing practical guidance to getting started all the way through the nuts and bolts of the writing and editing process It will also help you to get and stay in the right mental framework and establish good habits from the beginning putting you in a commanding position later on Examples are tailored to the biological sciences offering a unique reference for PhD students in these disciplines Embarking on a PhD doesn t need to be daunting even if it s your first experience working within academia Each short section focuses on writing considered by many to be the most difficult aspect of a PhD and delves into a practical detail of one aspect from the title to the supplementary material Whether you re a student just starting your studies an early career researcher or a supervisor struggling to cope the book provides the insider information you need to get ahead [Synthesizing Synchronous Systems by Static Scheduling in Space-Time](#) Björn Lisper, 1989-05-10 The subject of this book is the synthesis of synchronous hardware The purpose is to provide a firm mathematical foundation for the so called space time mapping methods for hardware synthesis that have been proposed during the last few years Thus the treatment is fairly mathematical In a space time mapping method an algorithm is described as a set of atomic events with possible data dependencies between them The task is to find a mapping assigning a space time coordinate to each event so that causality is not violated and the solution is good Previous work in the area if it provided any formalism at all has relied mainly on uniform recurrence equations extensions thereof or on purely graph theoretic formulations In this project algebra is used instead and the close connection with single assignment languages is stressed Thus it is possible to generalize previous work and to give simple characterizations of the type of algorithms that

can be implemented with space time mappings The results presented can be applied to hardware construction and compiler techniques for parallel computers
