Picken, 2010-12-28 One of Japan s major religions Shinto has no doctrines and there are no sacred texts from which religious authority can be derived It does not have an identifiable historical founder and it has survived the vicissitudes of history through rituals and symbols rather than through continuity of doctrine Shinto is primarily a religion of nature centered on the cultivation of rice the basis of a culture with which the western world is not familiar in terms of either its annual cycle or the kind of lifestyle it generates The roots of the Shinto tradition probably precede this and reflect an awareness of the natural order The oldest shrines came to be located in places that inspired awe and wonder in their observers such as the great Fall of Nachi in Kumano or in mountains that conveyed a sense of power The expanded second edition of the Historical Dictionary of Shinto relates the history of Shinto through a chronology an introductory essay an extensive bibliography and over 800 cross referenced dictionary entries on Shinto concepts significant figures places activities and periods Scholars and students will find the overviews and sources for further research provided by this book to be enormously helpful **Home Visits Abroad; a Guide to Planning Personal and Professional Visits** Clara L. Simerville, 1961 [Weaving and Wearing Identity: Personal Adornment in Past Societies](#) Gabriella Longhitano, Karina Grömer, Alistair Dickey, Giulia Muti, Sarah Hitchens, 2026-02-03 This book examines questions surrounding body adornments and its link to identity in archaeology looking at theoretical and

interpretive frameworks that are relevant to the study of different categories of personal ornaments Identity is a crucial topic in archaeology where its concept is investigated through the study of many categories of material culture As self representation identity constitutes a choice through which an individual or a group want to be seen by others The volume covers a wide geographical and chronological frame from the Upper Paleolithic era to Medieval times examining North Central and Southern Europe as well as regions in Southwest Asia and North Africa This book is based on a session organised at the European Archaeological Association EAA in 2023 with a commonality namely body adornments Participants explored the ways in which possessing wearing and or trading personal ornaments was a means through which individual and social identity could be expressed in antiquity This volume is of relevance to archaeological researchers practitioners and students

Kiplinger's Personal Finance, 1997-06 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics *Globalization and Local Adaptation in International Trade Law* Pitman B. Potter, Ljiljana Biukovic, 2011-01-01 The trade principles of Western liberal democracies are at the core of international trade law regimes and standards Are non Western societies uniformly adopting international standards or are they adapting them to local norms and cultural values This volume presents a new conceptual approach the paradigm of selective adaptation to explore and explain the reception of international trade law in the Pacific Rim Building on a conceptual discussion of the normative and institutional contexts for international law the contributors draw on examples from China Japan Thailand and North America to show that formal acceptance of international trade standards through accession to the World Trade Organization and the General Agreement on Tariffs and Trade does not necessarily translate into uniform enforcement and acceptance at the local level This book provides compelling evidence that non uniform compliance will be a legitimate outcome of the globalization of international trade law
