

Discussion Paper on E-commerce in India

Introduction:

E-commerce in recent times has been growing rapidly across the world. According to Report of Digital-Commerce, IAMA-IIMRB (2013), e-commerce industry in India has witnessed a growth of US\$ 3.8 billion in the year 2009 to US\$ 9.5 billion in 2012. By 2013, the market is expected to reach US\$12.6 billion, showing year to year growth of 34%. Industry sources indicate that this growth can be sustained over a longer period of time as e-commerce will continue to reach new geographies and encompass new markets. E-commerce means sale or purchase of goods and services conducted over network of computers or TV channels by methods specifically designed for the purpose. Even though goods and services are ordered electronically, payments or delivery of goods and services need not be conducted online. E-commerce transaction can be between businesses, households, individuals, governments and other public or private organizations. There are numerous types of e-commerce transactions that occur online ranging from sale of clothes, shoes, books etc. to services such as airline tickets or making hotel bookings etc.

1.2 The bookings done through electronic communication could be Business to Business (B2B) or Business to Consumer (B2C). **Business to Business** i.e. **B2B** is e-commerce between businesses such as between a manufacturer and a wholesaler or between a wholesaler and a retailer. As per the WTO report WT/COMTD/W/193, global B2B transactions comprise 90% of all e-commerce. According to research conducted by USA based International Data Corporation, it is estimated that global B2B commerce, especially among wholesalers and distributors amounted to US\$12.4 trillion at the end of 2012.

1.3 The bookings done electronically between **Business to Consumer** for purchase or sale of goods and services is known as **B2C e-commerce**. Although B2C e-commerce receives a lot of attention, B2B transactions far exceed B2C transactions. According to IDC, global B2C transactions are estimated to have reached US\$ 1.2 trillion at the end of 2012, ten times less than B2B transactions. B2C e-Commerce entails business selling to general public/ e-catalogues that make use of shopping place. There are several variants in B2C model that operate in e-commerce arena.

1.4 From the point of view of business, there are two models of e-commerce. First model is known as 'Market Place' model, which works like exchange for buyers and sellers. The 'Market Place' provides a platform for business transactions between buyers and sellers to take place and in return for the services provided, earns commission from sellers of goods/services. Ownership of the inventory in this model vests with the number of enterprises which advertise their products on the website and are ultimate sellers of goods or services. The 'Market Place', thus, works as a facilitator of e-commerce. Different from the 'Market Place' model is the second category of business known as 'Inventory Based' model. In this model, ownership of goods and services and market place vests with the same entity. This model does not work as a facilitator of e-commerce, being delineated therefrom, but is engaged in e-commerce directly.
