

# 5 Principles to Design Successful Learning Programs

1

## Connect learning to business objectives

Workplace learning should connect to business and performance objectives, as well as capability needs.

- Study the company's mission.
- Pinpoint the skills required.
- Determine how these skills can be applied to outcomes or problems.

## Create personalized learning journeys

These journeys should align with skills needs and learner experiences.

- Provide self-paced and self-directed opportunities to learn the skills needed for now and tomorrow.

2

3

## Use a (right) mix of training methods

Adults possess diverse learning styles, so L&D programs should offer varied training methods instead of sticking to one.

- Key modalities include microlearning, immersive methods like augmented reality and virtual environments, and learning from direct experiences.

## Continuously and dynamically improve learning

Adopt an agile learning methodology to change, improve, and adapt constantly.

- Convene subject matter experts (SMEs) and business leaders to understand which skills will shape the future workplace.
- Understand evolving learner needs—learning styles, formats, and topics.

4

5

## Curate, automate and streamline learning

Prioritize content curation over new content design and streamline and automate content.

- Make a thorough inventory of learning materials and skills needs to optimize and speed up the training process.
- Leverage technology (e.g., AI) to create learning content and curate learning journeys based on employee and training data.
