

Creative Problem Solving

New for 2015-2016

The average of the team test score will now be counted as part of the final score for the team. The rating sheet has been updated.

Purpose: To encourage HOSA members to analyze the problem solving process and to work as a team to apply their problem solving skills in creating a solution to a hypothetical health or HOSA-related problem.

Description: This event will involve two rounds of competition. Round One will consist of a written test to evaluate the team's understanding of problem solving processes and theories. The top scoring teams will advance to Round Two and will be given a potential problem related to HOSA, a health issue or the health community. Teams will have 30 minutes to analyze the problem. Selected resource materials related to the problem will be provided. At the end of the preparation time, teams will have eight (8) minutes to present their solution to a panel of judges.

Dress Code: Competitors shall wear the HOSA uniform or proper business attire. Bonus points will be awarded in both rounds for [proper dress](#). All team members must be properly dressed to receive bonus points.

- Rules and Procedures**
1. Competitors in this event must be active members of HOSA in good standing in the category in which they are registered to compete (Secondary or Postsecondary/Collegiate).
 2. Competitors must be familiar with and adhere to the "[General Rules and Regulations of the National HOSA Competitive Events Program \(GRN\)](#)."
 3. Teams must be composed of three (3) or four (4) members.
 4. **Round One Test Instructions:** Each team will be evaluated in Round One by a fifty (50) item multiple choice written test. Competitors will be given sixty (60) minutes to complete the test, which will be administered during the event presentation session. **No proctors are allowed for this event.** Team scores will be averaged to determine who will qualify for Round Two. The averaged scores will be added to the final solution presentation for a final tally.

Practice Problems for Creative Problem Solving Jeffery Adams,2014-11-26 Problem solving consists of using generic or ad hoc methods in an orderly manner for finding solutions to problems Some of the problem solving techniques developed and used in artificial intelligence computer science engineering mathematics medicine etc are related to mental problem solving techniques studied in psychology The term problem solving is used in many disciplines sometimes with different perspectives and often with different terminologies For instance it is a mental process in psychology and a computerized process in computer science Problems can also be classified into two different types ill defined and well defined from which appropriate solutions are to be made Ill defined problems are those that do not have clear goals solution paths or expected solution Well defined problems have specific goals clearly defined solution paths and clear expected solutions These problems also allow for more initial planning than ill defined problems Being able to solve problems sometimes involves dealing with pragmatics logic and semantics interpretation of the problem The ability to understand what the goal of the problem is and what rules could be applied represent the key to solving the problem Sometimes the problem requires some abstract thinking and coming up with a creative solution **Stratgies For Creative Problem Solving Custom Edition**
