It is certain, however, that the development of the art of writing preceded the invention of ink by almost a thousand years. Today inks are divided into two classes: printing inks and writing inks. Printing is a process for reproducing text and images typically with ink on paper using a printing press. It is often carried out as a large scale industrial process and is an essential part of publishing and transaction printing. Different techniques and printing equipments are employed for each printing practice. The demand for innovative printing practices has been on a high in recent times. There are various kinds of printing processes: lithographic process, the gravure process, offset printing process, etc. Different types of inks derived from different processes are ball pen inks, bleachable inks, fluorescent inks, fast drying ink, automatic press inks, rotary press inks, coated paper inks, planographic inks, lithographic inks, offset tin printing inks, etc. The Printing Ink industries have grown significantly during the last decade and this industry is characterized by exceeding high margin profit. As we read newspapers, magazines, and books on a daily basis, therefore, inks are found in almost every aspect of human activity. The worldwide printing inks market is projected to register a CAGR of about 2.8%. Printing inks market embodies the strength of the global as well as regional economies. With its high correlation to a national GDP, the printing inks market is cyclical in nature with economic ups and downs amplifying the demand patterns. The world printing inks market is projected to grow moderately over the next couple of years. The major contents of the book are pigment in the printing inks, manufacturing of printing inks, storage and testing of raw materials, planographic inks, lithographic inks, factors effecting visual appearance of ink, film factors effecting visual appearance of ink, film method of mixing metallic powder and varnish, the principle of reproducing photographs by printing methods, etc. In this book, an attempt has been made to bring together the useful manner as possible the fundamental Principles of ink making.
