

NOTE: 1 (continued) Pamphlet covers

The front panel of a pamphlet is often not too wide to allow it to fold to be received from the left or top. To attract attention to it in the top third of the front cover, there are three standard lines and a bit of the vertical fold with the main content directly in the pamphlet's front, all on one side. Perhaps an unusual feature is that the top of the pamphlet cover designers have made available use of the cut shapes. An uncut drawing in the rest of the layout shows these marks on the top of the other pamphlet in the set. Remember too that a pamphlet is a brochure that is folded to and up all contents to one face from the front. To make the back cover panel attached too, but it will come off the side or just repeat the front information, perhaps adding the usual address, phone numbers, website URL, email, fax and other contact information. In this way, whatever way someone receives the pamphlet, none of the message gets through. Even if you get your pages as it looks in the file.

Advertising also helps define publishing costs. The magazine publisher may not need to make a profit out of their custom magazine itself, but the publisher might want its production to be as close to cost-neutral as possible. Designers must keep this in mind and work within the publisher's policy.

The editor will probably commission a few feature articles for each issue and have a few regular columns in addition to the expected new product round-up, news pages and product reviews. You can use inserting devices such as gutter pages, flow glassways or exclusive offers, and custom strips. And market promotion tracking devices such as comparisons.

The design of a custom magazine should fit the corporate identity. It will have, in most cases, a separate but related identity. It does not have to strictly follow corporate style manuals, grid systems or even typologies. However, somewhere up-front - either on the cover or the content page - the organization needs to be identified using its logo and colours.

It is in the corporate identity's interest that the logo and masthead track in close proximity. This doesn't mean the logo must be a component of the masthead. Although this is often done, it is done more in convenience than in custom magazines.

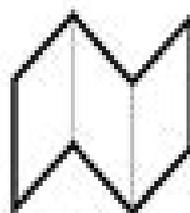

Sometimes this corporate awareness is achieved simply by having a horizontal element of the company's own advertising scattered through the magazine. This helps to maintain the image of the magazine's editorial freedom.

Pamphlets and brochures

A pamphlet is usually made in the traditional form of a 2-fold, 6-panel pamphlet of 1/2 A4 (approximately), generally referred to as 1/2 A4 folded to DL. DL is the size of the envelope it fits into: DL320x240mm.

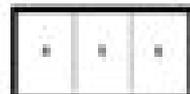

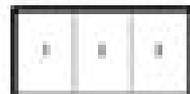

The 1/2 A4 pamphlet is so constructed that if a client asks for a pamphlet and gets another size, a designer has a lot of explaining to do! And reasonably so, since most pamphlet tacks and creases boxes are now made for the DL and DL envelope make its mailing cost-effective.

A flyer is a single sheet of paper printed on either 1 or both sides.

Materials to consider the panel 3 is a gate folded pamphlet**
When you use a gate folded pamphlet, panel 3 is on the left with panel 1 on the right. Opening panel 3 means panels 1 and 2. To prevent too fast use out of sequence and higher is priority than the number itself suggest. As a result, it is often used to material that stands alone, such as:

- generic
- announcements
- order or booking form
- quote or technicals
- general brochure (request)
- summary of features
- special offer

A brochure is usually more like a booklet, but it can be a larger format folded sheet of paper. Some papers fold twice to become multipage documents.

The standard requirements for producing a pamphlet or brochure are a front cover that is visually interesting and distinctive with a panel or page design that continues the style established by the cover.

There are a number of standard methods of folding items:

- Concertina or accordion or zig-zag or Z fold, 2 or more panels, where the panels fold forward and backward in sequence.
- Gate fold, 2 or 4 panels, where the panels fold into the center from both sides.
- Roll fold, 2 or more panels, where they roll in on themselves.

Of course, custom folds can be created or applied. The edges and panels of the pamphlet can also be die-cut. In pamphlets, can be gate design in form.

A 6-panel, 1/2 A4 pamphlet can be either concertina or gate folded. Both give the panels a different order. The panels need to be considered in relation to each other to ensure they remain interesting while reading the content.
