EDGE (home™) INTRODUCTION

Thank you for your purchase of a EDGE (home™) product. The EDGE (home™) devices allow for intelligent energy monitoring and control of lighting and electrical appliances. The devices incorporate proprietary ZEP™ protocol that allows wireless two-way communication and gives the ability to remotely control these devices by a ZEP™ compatible controller. Controlled devices are easily paired with switches through the user interface on the tablet to allow direct control from the switches.

EDGE (home™) devices controlling appliances which present a hazard (condition due to unattended or unintentional or automatic power-on/control such as electric heating devices) should be removed from pairing to remote controllers and should not be used in rooms.

Double check all pairings before completing the installation.

Other than the battery on the EDGE (home™) BATTERY SWITCH, there are no serviceable parts in the EDGE(home™) devices.

Refer to the wiring diagrams in Figures 1-5 for the connections to the appropriate device. Note that the Switch in Figure 4 is battery powered and does not have connections to line power. The Dry Contacts in Figure 5 connect a common (CN_COMMON) to two (2) separate N.O. Dry Contacts.

1. Make sure all power to the branch circuit has been disconnected by turning off the circuit breaker or disconnecting the fuse at the electrical panel.
2. If applicable, remove the faceplate from the existing wall outlet/switch, remove the outlet/switch from the wall box and disconnect the wires from the existing outlet/switch.
3. Identify the wires on the EDGE (home™) device that match the appropriate wiring diagram in Figures 1-6. The wires should be labeled on the plastic case of the EDGE (home™) device.
4. Using wire strippers, remove 1/2" of insulation from each of the wires connected to the EDGE (home™) device.
5. Install the EDGE (home™) device by connecting the wires as per the wiring configuration in Figures 1-6 for the appropriate device. The EDGE (home™) device does not require a ground wire, but the switch or outlet should be grounded to the green or bare wire from the circuit.
