Advances in Artificial Intelligence Martin C. Golumbic, 2012-12-06 Research in artificial intelligence natural language processing and knowledge based systems has blossomed during the past decade At national and international symposia as well as in research centers and universities all over the world these subjects have been the focus of intense debate and study This is equally true in Israel which has hosted several international forums on these topics The articles in this book represent a selection of contributions presented at recent AI conferences held in Israel A theoretical model for a system that learns from its own experience in playing board games is presented in *Learning from Experience in Board Games* by Ze ev Ben Porat and Martin Golumbic The model enables such a system to enhance and improve its playing capabilities through the use of a learning mechanism which extracts knowledge from actual playing experience The learning process requires no external guidance or assistance This model was implemented and tested on a variant of Chinese Checkers The paper shows the feasibility and validity of the proposed model and investigates the parameters that affect its performance traits The experimental results give evidence of the validity of the model as a powerful learning mechanism Original and general algorithms for knowledge extraction and pattern matching were designed and tested as part of the prototype computer system Analysis of the performance characteristics of these algorithms indicates that they can handle large knowledge bases in an efficient manner

McKeen, 2016-10-19 Permeability Properties of Plastics and Elastomers Fourth Edition provides a comprehensive collection of graphical multipoint and tabular data covering the permeation of liquids vapors and gases through plastic or polymeric materials such as films membranes and containers This updated edition includes an entirely new chapter on sustainable and biodegradable polymers and an extensive introductory section covering fatigue what it is how it is measured and the fundamentals of permeation and permeability properties Foundational information is also provided on the production of films containers membranes and the markets and applications for these materials Presents an essential reference tool part of the daily workflow of engineers and scientists involved in the plastics industry and product design with plastics Helps practitioners gain knowledge of exact permeation rates for liquids vapors or gases through a range of polymeric materials Enables engineers to improve performance of their products where permeability properties are important from where packages need to be near hermetically sealed to where a selectively permeable barrier is required *A Formalization of Set Theory Without Variables* Alfred Tarski, Steven R. Gibbs, 1986 This is a collection of papers presented at the Topical Meeting on Optical Bistability OB3 held December 2 4 1985 in Tucson Arizona The increase in attendance to almost 200 shows that interest continues to grow in the subject of optical bistability OB and its wider implications both in application to optical digital computing and to basic physics notably instabilities and spatial effects The maturing of the field is evidenced by the fact that the number of experimental papers has caught up with the number of theoretical ones These trends were already apparent in OB2 and the 1984 Royal Society Meeting on Optical Bistability Dynamical Nonlinearity and Photonic Logic Progress in experimental topics included guided wave OB mostly thermal picosecond switching studies on quite a number of new materials optical computing and pattern recognition using arrays of nonlinear etalons Theoretical progress ranged from rather practical calculations on device performance noise effects on switching and transverse and longitudinal spatial effects to fundamental studies of dynamics instabilities and chaos The Conference also included both theoretical ideas on

optical computer architecture and intrinsic OB circuit elements such as full adder as well as the first demonstration of an intrinsic optical circuit in the form of a cascaded loop with buffered stores A first demonstration of a simple pattern recognition algorithm using 2 D arrays of spots on a ZnSe interference filter was reported **Integrating Time, Space, Movement and Geographic Information Systems** Nicholas A.
