Hyperspectral Remote Sensing Ruiliang Pu, 2017-08-16 Advanced imaging spectral technology and hyperspectral analysis techniques for multiple applications are the key features of the book This book will present in one volume complete solutions from concepts fundamentals and methods of acquisition of hyperspectral data to analyses and applications of the data in a very coherent manner It will help readers to fully understand basic theories of HRS how to utilize various field spectrometers and bioinstruments the importance of radiometric correction and atmospheric correction the use of analysis tools and software and determine what to do with HRS technology and data Signal Processing Applications Using Multidimensional Polynomial Splines Dhananjay Singh, Madhusudan Singh, Zaynidinov Hakimjon, 2018-12-07 This book highlights new methods algorithms and software for the digital processing and recovery of signals In addition it describes a new method for modeling one dimensional and multidimensional signals as successions of local polynomial splines and their spectral characteristics It provides examples of how the proposed methods can be applied in specific cases together with signal processing software examples in the MATLAB environment and models of special processes in the Simulink environment The book s goal is to make it easier for beginners to understand the subject matter it is intended for engineers undergraduate and graduate students engaged in research or the evaluation and design of hardware and software for the digital processing and recovery of signals

Hyperspectral Data Processing Chein-I Chang, 2013-04-08 Hyperspectral Data Processing Algorithm Design and Analysis is a culmination of the research conducted in the Remote Sensing Signal and Image Processing Laboratory RSSIPL at the University of Maryland Baltimore County Specifically it treats hyperspectral image processing and hyperspectral signal processing as separate subjects in two different categories Most materials covered in this book can be used in conjunction with the author s first book Hyperspectral Imaging Techniques for Spectral Detection and Classification without much overlap Many results in this book are either new or have not been explored presented or published in the public domain These include various aspects of endmember extraction unsupervised linear spectral mixture analysis hyperspectral information compression hyperspectral signal coding and characterization as well as applications to conceal target detection multispectral imaging and magnetic resonance imaging Hyperspectral Data Processing contains eight major sections Part I provides fundamentals of hyperspectral data processing Part II offers various algorithm designs for endmember extraction Part III derives theory for supervised linear spectral mixture analysis Part IV designs unsupervised methods for hyperspectral image analysis Part V explores new concepts on hyperspectral information compression Parts VI VII develops techniques for hyperspectral signal coding and characterization Part VIII presents applications in multispectral imaging and magnetic resonance imaging Hyperspectral Data Processing compiles an algorithm compendium with MATLAB codes in an appendix to help readers implement many important algorithms developed in this book and write their own program codes without relying on software packages Hyperspectral Data Processing is a valuable

reference for those who have been involved with hyperspectral imaging and its techniques as well those who are new to the subject
