What is virtual water?

Virtual water is the volume of water used to produce consumer products. The total volume of water refers to all of the water used in the production of a product. For example, the total volume of water used in a food product would include the water used in the agricultural process, but also the water used in packaging and shipping. Virtual water is essentially all of the "hidden" water behind a product.

What is grey water?

Greywater is used household water sourced from baths, showers, bathroom basins and laundries, but excludes water from the toilet (which is regarded as 'blackwater'). Generally, greywater from the kitchen is not recommended for reuse due to the high levels of organic materials such as oils and fats.

What is green water?
