Enhancing Your Endocannabinoid System:

Vitamin Weed: A 4-Step Plan to Prevent and Reverse Endocannabinoid Deficiency Michele N. Ross, 2018-03-06 Cannabis isn't just for sick people. You have an endocannabinoid system and it's running on empty. Just like a vitamin D deficiency can be restored by taking vitamin D pills, an endocannabinoid deficiency can be treated by using cannabis CBD or other terpenes. The endocannabinoid system (ECS) is your largest neurotransmitter system and regulates dopamine, serotonin, and all your other neurotransmitters. In *Vitamin Weed*, neuroscientist Michele Ross, PhD, outlines how restoring balance to your ECS is the key to fighting inflammation, pain, aging, and even cancer. *Vitamin Weed* will help you get rid of aches and pain, boost energy, and reduce stress. Reduce dependence on prescription pills and drugs. Improve your mood and find motivation for life. Teach your body how to heal itself. Dr. Ross explains how endocannabinoid deficiency may be the root of disease and offers hope to patients struggling to find a diagnosis or relief from their symptoms. Whether you have Alzheimer's disease, fibromyalgia, cancer, endometriosis, Parkinson's disease, depression, anxiety, PTSD, menopause, migraine, headache, lupus, psoriasis, or chronic pain, Dr. Michele Noonan Ross will guide you how to use cannabis CBD and other natural remedies to relieve your symptoms and get you back to healthy. *Vitamin Weed* outlines a 4-step plan to eliminate lifestyle choices that harm your ECS, foods you can add to prime your ECS for optimal function, ways to manage stress to prevent shutdown of your ECS, and how to add cannabis or CBD to your regimen depending on your local laws and preferences. *Vitamin Weed* brings new hope to patients, caregivers, physicians, and disease nonprofits struggling without solutions. By combining the secrets of the endocannabinoid system with holistic medicine, Dr. Michele Ross paints a new future where cannabis is preventative medicine and chronic illness is obsolete.

Dr. Eric Goodman's innovative approach to self-healing. Foundation Training has helped athletes, first responders, celebrities, and regular folks around the world. The heart of Foundation Training is a unique form of biomechanics, a series of postures, poses, and movements designed to teach the body's individual muscles to act within strong, flexible chains, shifting the burden of support away from sensitive joints. Foundations of Health builds on this core program, going deep into its principles to help us understand how to maintain a healthy body even when the mechanics eventually break down. Our bodies are built to heal themselves without surgeries and prescriptive medications. The protocols expand on the original Foundation Training concepts, focusing on the endogenous cannabinoid stimulators, part of an extraordinary built-in endocannabinoid system that profoundly affects our central enteric and peripheral nervous systems and helps to regulate numerous responses in our body. Dr. Goodman explains the science behind the endogenous cannabinoid system and how it can be stimulated in natural and healthy ways, including heat, breath, work, and movement techniques that will help guide and maintain the state of balance the body needs to function optimally with stability and harmony. He recommends foods, herbs, and supplements likely to ease pain, lower stress, and boost mental and physical function. He addresses the notable medicinal benefits of CBD, THC, and the many terpenes associated with cannabis's reputation for healing and teaches how to be a smart consumer of cannabinoids. Biopsychology clearly presents the fundamentals of the study of the biology of behavior and makes the topics personally and socially relevant to the student. The defining feature of Biopsychology is its unique combination of biopsychological science and personal reader-oriented discourse. It is a textbook that is untextbooklike. Rather than introducing biopsychology in the usual textbook fashion, it interweaves the fundamentals of the field with clinical case studies, social issues, personal implications, and humorous anecdotes. It tries to be a friendly mentor that speaks directly to the reader enthusiastically.
