Research for Materials Development in Language Learning Brian Tomlinson, Hitomi Masuhara, 2010-11-18 This title examines current research in materials development and discusses their implications for the learning and teaching of languages Recently there has been a dramatic increase in the attention given to materials development as an academic discipline More universities are including modules on materials development on their MA in applied linguistics courses and more students are studying materials development in their PhD research Yet to date there has been no publication focusing on reporting and discussing the results of research in materials development This fills that gap reporting on the results of recent research projects in materials development and discussing their implications for the learning and teaching of languages The editors introduction outlines the rationale scope and objectives of the book and reviews previously published reports of research in materials development There are concluding chapters which point out implications for second language acquisition theory and research methodology The book features suggest applications of the reported research for materials development and proposals for future action in research in materials development for language teaching *The Complete Guide to the Theory and Practice of Materials Development for Language Learning* Brian Tomlinson, Hitomi Masuhara, 2017-06-16 *The Complete Guide to the Theory and Practice of Materials Development for Language Learning* provides undergraduate and graduate level students in applied linguistics and TESOL researchers materials developers and teachers with everything they need to know about the latest theory and practice of language learning materials development for all media The past two decades have seen historic change in the field of language learning materials development The four main drivers of that change include a shift in emphasis from materials for language teaching to language learning evidenced based development the huge increase in digital delivery technologies and the wedding of materials developed for the learning of English with those for other second or foreign languages Timely authoritative and global in scope this text represents the ideal resource for all those studying and working in the field of language learning *Developing Materials*

for Language Teaching Brian Tomlinson, 2014-02-13 There have been a number of books published on various aspects of materials development for language teaching but *Developing Materials for Language Teaching* is the only one which provides a comprehensive coverage of the main aspects and issues in the field This second edition brings it completely up to date and expands on the original book It deals with advances in IT and an increasingly globalized world It is the only publication which views current developments in materials development through the eyes of developers and users of materials from all over the world In doing so it applies principles to practice in ways demonstrated to facilitate the effectiveness of language learning materials The chapters are written so that the book provides critical overviews of recent developments in materials development and at the same time acts as a stimulus for development and innovation in the field It is intended both for use as a course book on postgraduate and teacher training courses and as a resource for the stimulus and refreshment of teachers publishers and applied linguists in the field The book contains updated versions of many of the chapters in the 2003 edition plus new chapters on corpus informed materials development materials development for blended learning materials development for EAP materials development for ESOL and materials development for young learners

Practice and Theory for Materials Development in L2 Learning Alan Maley, Hitomi Masuhara, Freda Mishan, 2017-03-07 This volume represents a unique addition to the growing body of empirical literature on materials development adopting a reverse approach to the topic Rather than applying theory to practice practitioners and researchers from 11 countries reappraise applied linguistics theories through practice The book also provides evidence for the diversity of materials development around the globe at different levels for different specialities and for different purposes Each chapter surveys the relevant literature such as task based learning and language and culture describes a specific research project reports the results of the project and discusses the implications of these results for the development of materials both in the local context and in general After each section there are editorial comments highlighting the issues emerging from the research and there is a conclusion which connects the findings of the various chapters and makes suggestions both for future research and for the principled development of materials for L2 learners The book will be suitable for teachers materials developers academics and students in post graduate courses in applied linguistics in TEFL TESOL and in the teaching of other languages as an L2
