Library & Information Science Abstracts ,2008 **Concurrent Engineering in Construction Projects** Chimay Anumba,John M. Kamara,Anne-Francoise Cutting-Decelle,2006-09-27 Concurrent Engineering CE is a systematic approach to the integrated and concurrent design of products and related processes which offers considerable potential for increasing efficiency and effectiveness by considering all the elements of a building or structure over its life cycle and including issues of quality cost schedule and user requirements This book presents latest research on the implementation of Concurrent Engineering in construction projects **Documentation Abstracts** ,2001 Library Automation Dania Bilal,2014-03-26 Recent advances in technology such as cloud computing recent industry standards such as RFID bibliographic standards like RDA and BIBFRAME the increased adoption of open source integrated library systems ILS and continued shift in users expectations have increased the complexity of the decision regarding ILS for all types of libraries Recent advances in technology such as cloud computing recent industry standards such as RFID bibliographic standards like RDA and BIBFRAME the increased adoption of open source integrated library systems ILS and continued shift in users expectations have increased the complexity of the decision regarding ILS for all types of libraries In a complete re envisioning of the previous edition Automating Media Centers and Small Libraries A Microcomputer Based Approach Dania Bilal conceptualizes library automation in the Library Automation Life Cycle LALC that is informed by the systems development lifecycle SDLC She explains how the next generation discovery services supported in the library services platforms LSPs provide a single point of access to library content in all types and formats thereby offering a unified solution to managing library operations The book covers methods of analyzing user requirements describes how to structure these requirements in RFPs and details proprietary and open source integrated library systems ILSs and LSPs for school public special and academic libraries Up to date information is provided about ILS software installation and testing software and hardware architecture such as single and multi tenant SaaS and Paas and IaaS and usability assessment strategies for evaluating the ILS or LSP The author concludes by describing what is likely coming next in the library automation arena **Quality Software Project Management** Robert T. Futrell,Donald F. Shafer,Linda Shafer,2002 Annotation Drawing on best practices identified at the Software Quality Institute and embodied in bodies of knowledge from the Project Management Institute the American Society of Quality IEEE and the Software Engineering Institute Quality Software Project Management teaches 34 critical skills that allow any manager to minimize costs risks and time to market Written by leading practitioners Robert T Futrell Donald F Shafer and Linda I Shafer it addresses the entire project lifecycle covering process project and people It contains extensive practical resources including downloadable checklists templates and forms *Project Workflow Management* Dan Epstein,Rich Maltzman,2013-11-01 Foreword by industry legend Harold Kerzner This book describes a completely unique step by step workflow guiding approach to project management which simplifies activities by enforcing execution of all

required processes on time and redirecting to an alternative path in the event of project issues Since compliance with all project management processes is enforced by the workflow product quality is significantly improved and life cycle errors are almost eliminated Project Workflow Management A Business Process Approach is the first and only book in the marketplace which enables readers with no prior project management experience to manage the entire life cycle of any small to mid sized project It also equips mid and senior level project managers with directions and a detailed map to the effective management of complex projects and programs *Introduction to Software Project Management* Adolfo Villafiorita,2016-04-19 Although software development is one of the most complex activities carried out by man sound development processes and proper project management can help ensure your software projects are delivered on time and under budget Providing the know how to manage software projects effectively Introduction to Software Project Management supplies an acces **Electronic Documents** ,1995 Automatic extraction and processing of document references Kathrin Eichler,2010-10-13 Master s Thesis from the year 2007 in the subject Computer Science Applied grade 1 0 University of Sunderland School of Computing and Technology language English abstract While reading documents you often encounter text passages advising you to refer to other documents for more information about a specific topic These references to other documents are particularly common in technical documents written for the sole purpose of providing the reader with as much relevant information as possible without rephrasing information that can be found elsewhere Knowing how the documents in a system are interrelated i e which other documents a document refers to or is referred by can be extremely helpful when trying to get access to relevant information A typical example of such a knowledge net providing information about document relations is CiteSeer a digital library of academic literature For each document in the library system CiteSeer displays lists of related documents such as a list of documents that the current document cites as well as a list of documents that the current document is cited by The assumption that inspired this thesis is that such lists are not only helpful when reading academic literature but could also assist a reader of technical documents stored in a company s document management system The idea was thus to extend an existing document management system by displaying for each document stored in the system a list of links to documents that the current document refers to As information about how the documents in this system are interrelated was not available the focus of the project underlying this thesis was on the first step towards solving this task automatically analyzing documents in order to extract names of related documents Once all document names mentioned in a document have been extracted the next step would then be to search for these documents in the system s database and in case they have been successfully found create links to the respective documents The outcome of the project was a system that performs the extraction task It is based on Conditional Random Fields a machine learning technique introduced by Lafferty et al 2001 and is able to extract document names from unseen documents achieving high precision scores 88% and acceptable recall scores 65% on a test dataset The implementation is based on a Java package provided by Sarawagi Cohen 2005 which was adapted and extended

to suit the nature of the task As the approach is based on supervised learning the project also involved the generation of appropriate training data   *Developing and Hosting Applications on the Cloud* Alex Amies,Harm Sluiman,Qiang Guo Tong,Guo Ning Liu,2012-07-02 A Complete Practical Guide to Building and Hosting Cloud Services That Deliver Exceptional Business Value In this unique title key developers of the IBM SmartCloud Enterprise share indispensable insights for developing and operating cloud based solutions on any cloud platform Drawing on their unsurpassed in the trenches experience the authors help you develop the new mindset and skills needed to succeed in cloud environments where development business and system operations are linked more tightly than ever Using examples based on IBM SmartCloud Enterprise the authors cover a wide variety of cloud use cases while also introducing general principles for automating and optimizing IT infrastructure in any cloud environment They begin by presenting an authoritative accessible review of cloud computing and Infrastructure as a Service IaaS cloud concepts Next they demonstrate how to use cloud tools develop basic cloud applications and utilize standards to establish interoperability between clouds Finally drawing on deep personal experience they offer best practice solutions for all facets of cloud hosting including security monitoring performance availability and business support Throughout they emphasize real world problem solving offering numerous code examples and practical demonstrations of real world tools and utilities Coverage includes Understanding each cloud deployment model private community public and hybrid Reviewing key cloud computing use cases including those based on virtualization and collaboration Developing for the cloud with the LAMP stack Windows J2EE WebSphere and other technologies Building apps for the IBM SmartCloud Enterprise public infrastructure Using the command line toolkit Java and REST APIs to manage IBM SmartCloud Enterprise resources Exploring cloud computing standards and open source projects that promote interoperability among clouds Building cloud applications to customize images deliver network services install manage software and provide remote desktops Using IBM s powerful self service and delegated administration models and best of breed VM images Leveraging open source projects for cloud service management and virtualization Understanding cloud service security trusted certificates identity access management SSH HTTPS IPSec application hardening and much more Monitoring and optimizing performance and availability through the entire system lifecycle Managing scaling and automating cloud applications to meet business needs This title will be valuable to every enterprise developer architect and IT manager seeking the full benefits of cloud based services all ISVs building value add services on public clouds and everyone building applications that rely heavily on IaaS Platform as a Service PaaS Software as a Service SaaS or Business as a Service BaaS
