SCM Demand driven SCM is an end-to-end supply chain planning and replenishment process that enables companies to achieve their planned service levels from up to half the average level of inventory and requiring significantly less throughput capacity irrespective of the level of demand volatility or lead time length. Demand Driven Supply Chain Management is the go-to source for industry supply chain operations executives and students. It describes the what, how and why of the demand driven SCM process. The key themes in the book are: what is demand driven, why is demand driven so effective, how to operate a demand driven supply chain and how to adopt the demand driven process in your company.
