national boundaries historically the pattern in Europe has been for private equity groups to raise funds from banks insurance companies and government bodies in their own country with little involvement from foreign investors These barriers are now breaking down for two principal reasons First institutional investors particularly in the United States have become increasingly interested in European funds Second many international private equity firms have become more active in Europe A second driver of growth has been the entry of new talent into the industry Traditionally many European private equity investors had come from financial or consulting backgrounds rather than from operating roles
