Hoyle, 2023-02-17 This accessible volume presents both the mechanics of structural equation modeling SEM and specific SEM strategies and applications The editor along with an international group of contributors and editorial advisory board are leading methodologists who have organized the book to move from simpler material to more statistically complex modeling approaches Sections cover the foundations of SEM statistical underpinnings from assumptions to model modifications steps in implementation from data preparation through writing the SEM report and basic and advanced applications including new and emerging topics in SEM Each chapter provides conceptually oriented descriptions fully explicated analyses and engaging examples that reveal modeling possibilities for use with readers data Many of the chapters also include access to data and syntax files at the companion website allowing readers to try their hands at reproducing the authors results **Introduction to Psychometric Theory** Tenko Raykov, George A. Marcoulides, 2011-01-07 This new text provides a state of the art introduction to educational and psychological testing and measurement theory that reflects many intellectual developments of the past two decades The book introduces psychometric theory using a latent variable modeling LVM framework and emphasizes interval estimation throughout so as to better prepare readers for studying more advanced topics later in their careers Featuring numerous examples it presents an applied approach to conducting testing and measurement in the behavioral social and educational sciences Readers will find numerous tips on how to use test theory in today's actual testing situations To reflect the growing use of statistical software in psychometrics the authors introduce the use of Mplus after the first few chapters IBM SPSS SAS and R are also featured in several chapters Software codes and associated outputs are reviewed throughout to enhance comprehension Essentially all of the data used in the book are available on the website In addition instructors will find helpful PowerPoint lecture slides and questions and problems for each chapter The authors rely on LVM when discussing

fundamental concepts such as exploratory and confirmatory factor analysis test theory generalizability theory reliability and validity interval estimation nonlinear factor analysis generalized linear modeling and item response theory The varied applications make this book a valuable tool for those in the behavioral social educational and biomedical disciplines as well as in business economics and marketing A brief introduction to R is also provided Intended as a text for advanced undergraduate and or graduate courses in psychometrics testing and measurement measurement theory psychological testing and or educational and or psychological measurement taught in departments of psychology education human development epidemiology business and marketing it will also appeal to researchers in these disciplines Prerequisites include an introduction to statistics with exposure to regression analysis and ANOVA Familiarity with SPSS SAS STATA or R is also beneficial As a whole the book provides an invaluable introduction to measurement and test theory to those with limited or no familiarity with the mathematical and statistical procedures involved in measurement and testing

New Perspectives in Partial Least Squares and Related Methods Herve Abdi, Wynne W. Chin, Vincenzo Esposito Vinzi, Giorgio Russolillo, Laura Trinchera, 2013-10-17 New Perspectives in Partial Least Squares and Related Methods shares original peer reviewed research from presentations during the 2012 partial least squares methods meeting PLS 2012 This was the 7th meeting in the series of PLS conferences and the first to take place in the USA PLS is an abbreviation for Partial Least Squares and is also sometimes expanded as projection to latent structures This is an approach for modeling relations between data matrices of different types of variables measured on the same set of objects The twenty two papers in this volume which include three invited contributions from our keynote speakers provide a comprehensive overview of the current state of the most advanced research related to PLS and related methods Prominent scientists from around the world took part in PLS 2012 and their contributions covered the multiple dimensions of the partial least squares based methods These exciting theoretical developments ranged from partial least squares regression and correlation component based path modeling to regularized regression and subspace visualization In following the tradition of the six previous PLS meetings these contributions also included a large variety of PLS approaches such as PLS metamodels variable selection sparse PLS regression distance based PLS significance vs reliability and non linear PLS Finally these contributions applied PLS methods to data originating from the traditional econometric economic data to genomics data brain images information systems epidemiology and chemical spectroscopy Such a broad and comprehensive volume will also encourage new uses of PLS models in work by researchers and students in many fields
