**Systems Biology and Antimicrobial Drug Resistance** Vijay Soni , Saurabh Mishra, Aditya Kumar Sharma, Neha Dubey, 2024-09-18 Antimicrobial resistance AMR poses a significant threat to global public health With the emergence of new resistant strains and limited antibiotic treatment options it has become increasingly difficult to treat infections effectively This is particularly concerning for bacterial infections like Mycobacterium tuberculosis Acinetobacter spp Staphylococcus aureus and Pseudomonas aeruginosa where only a limited number of antibiotics are available for treatment According to the US National Strategy for Combating Antibiotic Resistant Bacteria approximately 2 million Americans are infected with antibiotic resistant bacteria each year and at least 23 000 die as a result The situation is even worse in developing countries Systems biology which aims to understand the complex interactions between the different components of a biological system has emerged as a powerful tool for studying AMR By integrating data from multiple sources including genomics

transcriptomics proteomics and metabolomics systems biology can provide a comprehensive view of the mechanisms underlying AMR This approach can lead to the identification of novel targets for drug development and the development of personalized treatment strategies that consider the specific characteristics of individual patients and the pathogens that infect them This Research Topic aims to explore the potential of systems biology in combating antibiotic resistance and highlight the need for further research to fully realize its clinical potential in infectious diseases

Intellectual Property and the Limits of Antitrust Katarzyna Czapracka, 2010-01-01 An excellent account of practice on both sides of the Atlantic regarding the intersection of antitrust and intellectual property rights The author provides a detailed account of the legal discussion in an economics informed manner A must read as far as I am concerned for practitioners and academicians alike Petros C Mavroidis Columbia Law School New York US University of Neuch tel Switzerland and CEPR UK This book examines the growing divergences between the EU and the US in their approach to antitrust law enforcement particularly where it relates to intellectual property IP rights The scope of US antitrust law as defined in the Supreme Court s decisions in Trinko and Credit Suisse Securities is much narrower than the scope of EU competition law US antitrust enforcers have become increasingly reluctant to apply antitrust rules to regulated markets whereas the European Commission has consistently used

EU competition rules to correct the externalities resulting from government action The contrasting approaches adopted by US and EU antitrust enforcers to these issues as with the differences in addressing market dominance have had a profound impact on the scope of antitrust intervention in the IP field This book provides an in depth analysis of the relevant recent developments on both sides of the Atlantic and identifies the pitfalls of regulating IP through competition rules With a unique comparative perspective this book will be an invaluable resource for postgraduate students academics and practitioners in IP and competition law
