

STRUCTURAL ENGINEERING IN RAILWAY WORK*

Discussion on Papers by Mr. J. S. Campbell and Mr. W. C. Clenshaw.

An Ordinary Meeting of the Institution of Structural Engineers was held at 11 Upper Belgrave Street, London, S.W.1, on Thursday, 26th April, 1945, Mr. Gower B. R. Pimm, M.Inst.C.E., M.I.Struct.E. (President) in the Chair.

Two papers were presented on Structural Engineering in Railway Work, the first having special reference to steelwork, by Mr. J. S. Campbell, M.I.Struct.E., M.Inst.W.E., and the second dealing with reinforced concrete, by Mr. W. C. Clenshaw, D.I.C., B.Sc., A.M.Inst.C.E.

Mr. W. K. WALLACE (Past-President, Chief Engineer L.M. & S. Railway), proposing the thanks of the Institution to the authors for their papers, said he was in the unusual position of having had two votes of thanks proposed to him already, by the authors themselves. Probably, however, if one could get them together privately, they would admit that he was one of the difficulties that railway employees had to deal with!

The papers were very interesting to structural engineers generally, for they showed that railway conditions had a considerable controlling effect on design. In most cases there was the necessity for keeping traffic working when the structural work was going on, and there were all sorts of limitations imposed by various operating conditions; very rarely did a railway structural engineer have a clear site on which to work.

Commenting on the fact that a considerable amount of structural work on the railways had to be done by direct labour, Mr. Wallace said a contractor would always point out the absolute fallacy of doing work by direct labour, claiming that no one but a contractor could really handle labour correctly; a contractor would say that he was an expert in construction, that he had specialised for years in doing work with maximum economy, and would make claims with the greatest imagination. Therefore, it was inadvisable for an owner to construct buildings or other works by direct labour. Whilst admitting that that was true up to a point, Mr. Wallace said that again the controlling conditions on railways entered into the problem, and it was almost impossible to let some jobs by contract. One could not always tell what were the conditions that the contractor would have to face. If one promised a contractor that a certain line would be clear from Saturday midnight until Monday morning, it might be that some body, recreational, educational or otherwise, might be holding a conference at a certain time
