*Machine Drawings; Piping Systems; Electrical and Electronics Prints; Architectural and Structural Steel Drawings*, Chapter  
1 BLUEPRINTS When you have read and understood this chapter you should be able to answer the following learning  
objectives Describe blueprints and how they are produced Identify the information contained in blueprints Explain the proper  
filing of blueprints Blueprints prints are copies of mechanical or other types of technical drawings The term blueprint reading  
means interpreting ideas expressed by others on drawings whether or not the drawings are actually blueprints Drawing or  
sketching is the universal language used by engineers technicians and skilled craftsmen Drawings need to convey all the  
necessary information to the person who will make or assemble the object in the drawing Blueprints show the construction  
details of parts machines ships aircraft buildings bridges roads and so forth BLUEPRINT PRODUCTION Original drawings  
are drawn or traced directly on translucent tracing paper or cloth using black waterproof India ink a pencil or computer  
aided drafting CAD systems The original drawing is a tracing or master copy These copies are rarely if ever sent to a shop or  
site Instead copies of the tracings are given to persons or offices where needed Tracings that are properly handled and  
stored will last indefinitely The term blueprint is used loosely to describe copies of original drawings or tracings One of the  
first processes developed to duplicate tracings produced white lines on a blue background hence the term blueprint Today  
however other methods produce prints of different colors The colors may be brown black gray or maroon The differences are  
in the types of paper and developing processes used A patented paper identified as BW paper produces prints with black  
lines on a white background The diazo or ammonia process produces prints with either black blue or maroon lines on a white  
background Another type of duplicating process rarely used to reproduce working drawings is the photostatic process in  
which a large camera reduces or enlarges a tracing or drawing The photostat has white lines on a dark background  
Businesses use this process to incorporate reduced size drawings into reports or records The standards and procedures  
prescribed for military drawings and blueprints are stated in military standards MIL STD and American National Standards  
Institute ANSI standards The Department of Defense Index of Specifications and Standards lists these standards it is issued  
on 31 July of each year The following list contains common MIL STD and ANSI standards listed by number and title that  
concern engineering drawings and blueprints **Mechanical Technology, Design and Production** United States.
