ECOOP - Object-Oriented Programming Erik Ernst, 2007-07-27 The 21st European Conference on Object Oriented Programming ECOOP 2007 was held in Berlin Germany on July 30 to August 3 2007 ECOOP is the most important and inspiring forum in Europe and beyond for researchers practitioners and students working in that smorgasbord of topics and approaches known as object orientation This topic area was explored and challenged by excellent invited speakers two of which were the winners of this year's Dahl Nygaard award in the carefully refereed and selected technical papers on posters via demonstrations and in tutorials Each of the many workshops complemented this with a very interactive and dynamic treatment of more specific topics nally panels allowed for loud and lively disagreement Yet it is one of ECOOP's special qualities that this plethora of activities add up to a coherent and exciting whole rather than deteriorating into chaos The Program Committee received 161 submissions this year Only 135 of them were carried through the full review process because of a number of retractions and a number of submissions of abstracts that were never followed by a full paper However the remaining papers were of very high quality and we accepted 25 of them for publication Helping very good papers to be published is more useful than having an impressively low acceptance rate The

papers were selected according to four groups of criteria whose priority depended on the paper relevance originality and significance precision and correctness and presentation and clarity Each paper had three four or five reviews depending on how controversial it was *Concise Cloud Compute* Vijay,2019-08-01 In simple terms the book is designed to give IT professionals an extensive idea of what cloud computing is all about the basic fundamentals what the different options of cloud computing are for an enterprise and how the same can be adopted to their own enterprise This book is exhaustive and covers almost all the top cloud computing technologies and to the lowest level of details which will help even a junior level IT professional to design and deploy cloud solutions based on the individual requirements This book offers high level of details which will help IT administrators to manage and maintain the corporate and SME IT infrastructure This book can also be a part of an engineering curriculum especially where information technology and computer science courses are offered
