Practical MythTV Michael Still, Stewart Smith, 2007-12-15 MythTV is a powerful open source personal video recorder PVR application that runs on Linux. Developed for several years by volunteers it offers a stable and extensible platform for automating all of the things you would expect from a PVR and much more.

Practical MythTV: Building a PVR and Media Center PC takes a project based approach to implementing your own MythTV setup. You get to pick and choose the functionality you want to install for your PVR and will learn the details of everything from selecting hardware to advanced customization. You will learn how to record your favorite television shows, store your DVDs for later playback, create a music library out of your CD collection and even use your PVR for voiceover IP. Your PVR wouldn't be complete without a remote control or the ability to play back content to other TVs in your home. You'll learn how to do both of these things in this book. You'll even learn how to utilize your Xbox as a remote front end to play back content. Beyond these basics you will learn advanced techniques like commercial detection and skipping auto expiring content, creating your own themes for MythTV and utilizing plug ins to do things like display weather conditions, RSS feeds and photo slide shows.
