The Routledge Companion to Planning in the Global South Gautam Bhan, Smita Srinivas, Vanessa

Watson, 2017-09-11 The Routledge Companion to Planning in the Global South offers an edited collection on planning in parts of the world which more often than not are unrecognised or unmarked in mainstream planning texts. In doing so its intention is not to fill a gap that leaves this mainstream unquestioned but to re-theorise planning from a deep understanding of place as well as a commitment to recognise the diverse modes of practice that come within it. The chapters thus take the form not of generalised universal analyses and prescriptions but instead are critical and located reflections in thinking about how to plan, act and intervene in highly complex city, regional and national contexts. Chapter authors in this Companion are not all planners or are planners of very different kinds and this diversity ensures a rich variety of insights primarily based on cases to emphasise the complexity of the world in which planning is expected to happen. The book is divided into a framing Introduction followed by five sections: planning and the state; economy and economic actors; new drivers of urban change; landscapes of citizenship and planning pedagogy. This volume will be of interest to all those wanting to explore the complexities of planning practice and the need for new theories of knowledge from which to draw insight to face the challenges of the 21st century.

Public-Private Partnerships in Urban Bus Systems Alejandro Hoyos Guerrero, Abel

Lopez Dodero, 2021-06-25 Many cities have sought to replicate the urban bus public private partnership (PPP) structures that succeeded at the beginning of the millennium such as those implemented in Brazil, Colombia and Mexico. These cities improved their public transportation systems in the face of rapid urbanization, rising air pollution and increasing road safety incidents through these PPP interventions. Examining these past international experiences and others, Public-Private Partnerships in Urban Bus Systems: An Analytical Framework for Project Identification and Preparation first challenges the assumption that PPP structures are always the optimal approach for improving urban bus systems. The authors use relevant case studies to demonstrate that structuring such PPPs in cities in the developing world requires tailor-made interventions that respond to local contexts. The authors identify essential elements for PPP feasibility and invite readers to consider alternative solutions for achieving the desired objectives. This book presents an analytical framework that public transportation practitioners can use to support the process of identifying and preparing appropriate technical, financial and legal structures to improve urban mobility if a PPP is the preferred solution. It follows a detailed risk-based approach to thoroughly analyze the challenges that might be experienced by cities that pursue private participation in proposed urban bus interventions. Using specific examples, the authors thoroughly analyze the risks and the specific potential planning stage challenges likely to be encountered and suggest strategies for practitioners to respond to the local contexts and the various alternative solutions. This study builds upon international experiences predominantly in Latin America and in PPPs focused on streamlining fleet provision and operation. Finally, the book helps to identify and define bankable project structures that could respond well to local contexts.
