## FOREWORD

*This Study Guide has been written for candidates preparing for the Industrial Hydraulic Mechanic Certification exam. It contains Task Statements which describe specific skills typical of the work of an Industrial Hydraulic Mechanic. Outcome statements appear after each task statement. Test items on the exam were written from the outcome statements. The manual also contains a discussion of the related subject matter with illustrations, references for additional study, and review questions.*

*This Study Guide is intended to provide a review of the major topics covered on the exam. By reading through the discussion of the subject matter following each Outcome statement, the candidate should be able to answer the study questions which follow. The candidate should also become familiar with the material covered by the exam questions through this process.*

*By necessity, the discussions in this Study Guide are not extensive. Additional references which provide a more thorough discussion on each subject are listed. Candidates are encouraged to consult these references. Candidates who are unable to answer the review*

*questions correctly should gain access to the references and study these for a more thorough understanding of the subject matter.*

*Candidates may also wish to consider participating in a Review Training Seminar. Those who have had little or no formal training in the area of industrial hydraulics have found the Review Training Seminars to be particularly helpful in preparing for the exam. Review Training Seminars provide a more thorough discussion of the subject matter, the opportunity to ask specific questions, and time to interact with other participants.*
