don't need a 1000 page book to get you started on the web's fastest growing programming platform. Instead, Learn Python in  
One Hour delivers on the promise of code literacy while saving your most precious commodity: time itself. Volkman's  
innovative programming by example approach means you focus on usage, not mindless detail. Based on the author's sold-out  
live seminars, you'll see Python's flexible coding technique in action as we refactor from script to procedural to object  
oriented during actual problem solving. In a twelve lesson progression, you'll be exposed to this and more: Basic file input and  
output operations including exceptions. Using functions to compute and return multiple values. Basic elements of a class  
definition and how to call methods. Lists, dictionaries, sets, and other collections. Iteration through collections, files, sorted sets.  
Searching strings with regular expressions, regex. Client and server programs for REST methods. Using threads in Python for  
multiple tasks. CGI/BIN programming for simple HTML Forms processing. Six most common Python pitfalls. Take the One  
Hour challenge and see if you too can pick up 90% of syntax and semantics in less time than you probably spend commuting  
each day. About the Author: Victor R. Volkman graduated cum laude from Michigan Technological University with a BS in  
Computer Science in 1986. Since then he has written for numerous publications including The C Gazette, C Users Journal,  
Windows Developers Journal, and many others. He has taught college level programming courses at Washtenaw Community  
College and has served on its Computer Information Science (CIS) Faculty Advisory Board for more than a decade. Volkman  
says Python helped him rediscover the joy of programming again. [www.volkman.org](http://www.volkman.org) From Modern Software Press **How**  
**to Teach Handwriting** Frank Nugent Freeman, Mary Lorette Dougherty, 1923 Two mistakes of an opposite nature have been  
made in teaching writing. The first is to expect writing to grow up incidentally without giving the child any specific training in  
the writing act. The second is to suppose that teaching writing is some strange, mysterious process which can be mastered  
only by special teachers who have had a large amount of technical training. However, writing can be taught by the grade  
teacher, and there are strong reasons why it should be so taught. Writing is an activity which the child performs in much of his  
her school work besides his writing lesson. It is necessary that all the writing be done properly, and it is the grade teacher  
who must see that it is properly done. **Vocabulary Drills, Intermediate Level** Edward Bernard Fry, 1989 **Course of**
