[Network Spread Models of Neurodegenerative Diseases](#) Ashish Raj,Yasser Iturria Medina,2019-04-18 It is a real pleasure to introduce the excellent papers contributed by leading experts to our Research Topic proposing various network models of dementia spread The focus is strongly on disease specific mathematical modeling rather than general graph theory The emerging field of network neuroscience visualizes the brain as a graph consisting of

nodes representing regions and edges as connections between them This complex network supports efficient communication along neural projections but also unfortunately the transmission and progression of Alzheimer s and other neurodegenerative disorders If we could know the brain s network organization could we then predict how degenerative processes might develop on this network As these papers demonstrate the answer is increasingly yes
